[Copyright, 1902, by The Chicago Daily News Co.]

PREFACE.

This, the nineteenth volume of The Chicago Daily News Almanac and Year Book, is, like the preceding issues, designed to be a handy book of reference for busy people. It has been made as compact as possible with the end in view of presenting the statistical, chronological, political, historical and other information contained in it in such form as to be readily available and easily understood. At the same time no effort has been spared to make it complete within its scope.

Statements and figures have been obtained from original, official and trustworthy sources and are believed to be as free from error as may be reasonably hoped for in a work of this kind, where opportunities for mistakes are almost innumerable.

The year 1902 contributed to history a number of events of more than ordinary importance. Among those concerning which information is given in this volume may be mentioned:

The destruction of the city of St. Pierre, Martinique, with its 30,000 inhabitants, by a volcanic eruption.

The establishment with the help of the United States of a republic in Cuba.

The restoration of peace and good order in the Philippines and the inauguration of civil rule over the entire archipelago under laws enacted by the congress of the United States.

The termination of the South African war and the effacement of the Dutch republics.

The coronation of King Edward and Queen Alexandra in London.

The accession of Alfonso XIII. to the throne of Spain.

The establishment of an offensive and defensive alliance between Great Britain and Japan.

The inauguration of a movement to further curb and regulate trusts and industrial combinations in the United States.

The election of a new congress in the United States and new governors and other officials in many of the states.

The Chicago Daily News Almanac and Year Book for 1903, while devoting much space to national and international affairs, also gives as usual a large amount of statistical and general information concerning Illinois and Chicago, all of which will be found fully indexed at the end of the volume.

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 2-13 were omitted).—This Calendar is from *Whitaker's London Almanack*, with some revisions.

WEATHER FORECASTS AND SIGNALS.

The weather bureau of the United States department of agriculture publishes daily more than 100,000 weather bulletins, not counting the forecasts in the newspapers. Most of these bulletins are in the form of postal cards printed by postmasters from telegraphic reports and sent by them to outlying towns for display at suitable points. There is also an elaborate system of

redistribution by means of telephones and railroads from established centers, so that there are comparatively few accessible places which do not now receive daily weather forecasts within a very short time after the observers have completed their work. The old system of conveying information about the weather by means of flag displays is also in general use.

Cold wave.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late spring and early fall the cold-wave flag is also used to indicate anticipated frosts.

EXPLANATION OF STORM-WARNING FLAGS.

Northwest winds. Southwest winds. Northeast winds. Southeast winds. "Hurricane" signal

A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

STEAM WHISTLE SIGNALS.

A warning of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds' duration) refer to weather, and shorter blasts (of from one to three seconds' duration) refer to temperature; those for weather are sounded first.

Three short.....	Cold wave

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and

Centigrade. The freezing and boiling points on their scales compare as follows:

Thermometer.	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.

Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.

Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.

Reaumur to Centigrade—Multiply by five-fourths.

Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.

Centigrade to Reaumur—Multiply by four-fifths.

WEIGHTS AND MEASURES USED IN THE UNITED STATES.

MEASURES OF LENGTH.		
12 inches = 1 foot.	8 furlongs = 1 mile	= 5,280 feet.
3 feet = 1 yard = 36 inches.	1.153 miles = 1 geographic mile	= 6,085 feet.
5½ yards = 1 rod = 16½ feet.	1.153 miles = 1 nautical (knot) mile	= 6,085 feet.
40 rods = 1 furlong = 660 feet.	1 fathom = 6 feet.

ACCESSION OF ALFONSO XIII.

Alfonso XIII., posthumous son of Alfonso XII., took the oath of allegiance to the constitution and ascended the throne of Spain on the 16th anniversary of his birth, May 17, 1902. At the same time his mother, Maria Christina, in a letter to the premier, Senor Sagasta, formally gave up the regency. The chief ceremonies took place in the chamber of deputies and the Cathedral of St. Francis. In the former the oath was administered to the king by Senor Vega Armijo, president of the cortes, in the presence of a brilliant assemblage of notables

from the chief nations of the world; in the latter the young monarch was blessed as the head of the catholic church in Spain. There was no actual coronation, it being held that Alfonso was king from the hour of his birth. The United States was represented by Dr. J. L. M. Curry, a former minister to Spain.

Just before the ceremonies an anarchist plot to kill the king by throwing a dynamite bomb into his carriage was discovered, but the conspirators were arrested before any harm was done.

RELATIVE PRICES OF COMMODITIES.

In this table, prepared by the department of labor in Washington, the average wholesale price in New York and other primary markets of each article for the years 1890-1899, inclusive, is taken as the base price and is represented by 100. The relative price is the average wholesale price for each year from 1890 to 1901 compared with the base price.

RATES OF POSTAGE AND MONEY ORDERS.

DOMESTIC.

Embraces the United States and island possessions, including Hawaii, Porto Rico, the Philippines, Guam and Tutuila.

FIRST CLASS.—Letters and all written or partly written matter, whether sealed or unsealed, and all other matter sealed or otherwise closed against inspection, 2 cents per ounce or fraction thereof. Postal cards issued by the government sold at 1 cent each; double, or reply cards, 2 cents each. Cards must not be changed or mutilated in any way and no printing or writing other than the address is allowable on the address side. "Private mailing cards" (post cards) require 1 cent postage. These cards must conform in shape and quality and weight of paper used to the cards issued by the government. Each card must be an unfolded piece of cardboard not exceeding 3 9-16 by 5 9-16 inches, nor less than 2 15-16 by 4 3/4 inches, and must bear at the top of the address side the words "Post Card." Advertisements and illustrations may be printed on either side provided they do not interfere with the distinctness of the address or postmark.

Among the articles requiring first-class postage are blank forms filled out in writing; certificates, checks and receipts filled out in writing; copy (manuscript or type-written) unaccompanied by proof sheets; plans and drawings containing written words, letters or figures; price lists containing written figures changing individual items; old letters sent singly or in bulk; typewritten matter and manifold copies thereof; and stenographic notes.

SECOND CLASS.—All regular newspapers, magazines and other periodicals issued at stated intervals not less frequently than four times a year, when mailed by publishers or news agents, 1 cent a pound or fraction thereof; when mailed by others, 1 cent for each four ounces or fractional parts thereof.

THIRD CLASS.—Books, circulars, pamphlets and other matter wholly in print (not included in second-class matter), 1 cent for each two ounces or fractional part thereof. The following named articles are among those subject to third-class rate of postage: Almanacs, architectural designs, blue prints, bulbs, seeds, roots, scions and plants, calendars, cards, press clippings with name and date of papers stamped or written in, engravings, samples of grain in its natural condition, imitation of hand or type written matter when mailed at postoffice window in a minimum number of twenty identical copies separately addressed; insurance applications and other blank forms mainly in print; printed labels, lithographs, maps, music books, photographs, tags, proof sheets, periodicals having the character of books and publications which depend for their circulation upon offers of premiums.

FOURTH CLASS.—All matter not in the first, second or third class, which is not in its form or nature liable to destroy, deface or otherwise damage the contents of the mailbag or harm the person of any one engaged in the postal service, 1 cent an ounce or fraction thereof. Included in fourth-class mail matter are the following articles: Blank books, blank cards or paper, blotters, playing cards, celluloid, coin, crayon pictures, cut flowers, metal or wood cuts, drawings, dried fruit, dried plants,

electrotype plates, framed engravings, envelopes, geological specimens, letterheads, cloth maps, samples of merchandise, metals, minerals, napkins, oil paintings, paper bags or wrapping paper, photograph albums, printed matter on other material than paper, queen bees properly packed, stationery, totypes, wall paper and wooden rulers bearing printed advertisements.

UNMAILABLE MATTER.—Includes that which is prohibited by law, regulation or treaty stipulation and that which by reason of illegible or insufficient address cannot be forwarded to destination. Among the articles prohibited are poisons, explosives or inflammable articles, articles exhaling bad odors, vinous, spirituous and malt liquors, specimens of disease germs, lottery letters and circulars, indecent and scurrilous matter.

SPECIAL DELIVERY.—Any article of mailable matter bearing a 10-cent special-delivery stamp in addition to the regular postage is entitled to immediate delivery on its arrival at the office of address between the hours of 7 a. m. and 11 p. m., if the office be of the free-delivery class; and between the hours of 7 a. m. and 7 p. m., if the office be other than a free-delivery office.

REGISTRATION.—All mailable matter may be registered at the rate of 8 cents for each package in addition to the regular postage, which must be prepaid. An indemnity not to exceed \$10 for any one piece, or the actual value if less than \$10, will be paid for the loss of first-class registered matter.

LIMITS OF WEIGHT.—No package of third or fourth class matter weighing more than four pounds, except single books, will be received for conveyance by mail. The limit of weight does not apply to second-class matter mailed at the second-class rate of postage, or at the rate of 1 cent for each four ounces, nor is it enforced against matter fully prepaid with postage stamps affixed at the first-class or letter rate of postage.

MONEY-ORDER FEES.—For domestic money orders in denominations of \$100 or less the following fees are charged:

For orders for sums not exceeding \$2.50.....	3c
For over \$2.50 and not exceeding \$5.....	5c
For over \$5 and not exceeding \$10.....	8c
For over \$10 and not exceeding \$20.....	10c
For over \$20 and not exceeding \$30.....	12c
For over \$30 and not exceeding \$40.....	15c
For over \$40 and not exceeding \$50.....	18c
For over \$50 and not exceeding \$60.....	20c
For over \$60 and not exceeding \$75.....	25c
For over \$75 and not exceeding \$100.....	30c

SUGGESTIONS.—Direct your mail matter to a postoffice, writing the name of the state plainly; and if to a city, add the street and number or postoffice box of the person addressed. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure the immediate return of all first-class matter to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Undelivered second, third and fourth class matter will not be forwarded or returned without a new prepayment of postage. When a return card appears on this matter either the sender or addressee is requested to send the postage. Register all valuable letters and packages.

FOREIGN.

Mail matter may be sent to any foreign country subject to the following rates and conditions:

REGISTRATION.—Eight cents additional to ordinary postage on all articles to foreign countries.

ON LETTERS.—Five cents for each half ounce or fraction thereof—prepayment optional except as to Canada and Mexico. Double rates are collected on delivery of unpaid or short-paid letters.

POST CARDS.—Single, 2 cents each; with paid reply, 4 cents each.

"Private Mailing Cards" (Post Cards).—Two cents each, subject to conditions governing domestic post cards.

EXISTING AGREEMENTS SUMMARIZED.

FRANCE—The United States reduces the rate of duty on crude tartar from France to 5 per cent ad valorem; on brandies or other spirits to \$1.75 per gallon; also a reduction on still wines and vermouth, and on paintings to 15 per cent ad valorem, while the French government gives its minimum tariff rates to canned meats, table fruits, dried fruits, lard, manufactured and prepared pork meats, hops, paving blocks, staves and logs and sawed or squared timber and lumber from the United States.

GERMANY—The United States gives the same tariff rates as those named in the treaty with France on tartar, brandies, still wines and paintings, and the German government gives to the United States the same tariff rates as those given to Belgium, Italy, Austria-Hungary, Roumania, Russia and Switzerland during the existence of the present tariff treaties with them and an-

nuls its regulations regarding dried fruits from the United States, providing in their stead a system of inspection on account of the San Jose scale.

PORTUGAL—The reductions on crude tartar, brandies, wines and paintings accorded to Germany and France are given by the United States to Portugal, and the Portuguese government gives to the United States as low rates of duty as those accorded to any other country, except Spain and Brazil, on breadstuffs, lard, mineral oils, agricultural implements and certain machinery for manufacturing.

ITALY—The above-named rates with reference to tartar, brandies, still wines and paintings are given by the United States, and a reduction is made by the Italian government on imports of cotton-seed oil, fish, machinery, scientific instruments, fertilizers and skins.

FIRST STRIKES IN THE UNITED STATES.

According to the report of the commissioner of labor the first strike in the United States took place in New York city in 1741, when a number of journeymen bakers combined and refused to bake until their wages were raised. Dates of other early strikes follow: Shoemakers, in Philadelphia, 1796

and 1798; sailors, in New York, 1803; Philadelphia shoemakers, 1805; New York cordwainers, 1809; Pittsburg cordwainers, 1815; Medford (Mass.) shiwwrights, 1817; Albany (N. Y.) printers, 1821; New York hatters, 1822. After 1825 strikes gradually became more numerous.

COMPLETION OF THE UGANDA RAILWAY.

A noteworthy event in the history of African progress was the opening of the Uganda railway as far as Port Florence, on Lake Victoria Nyanza, early in January, 1902. The line starts from Mombasa, an island just north of Zanzibar in the Indian

ocean, and is 582 miles long. It was begun in August, 1896, by the British government, and cost about \$25,000,000. The Salisbury viaduct connecting Mombasa with the mainland is a steel bridge 1,320 feet long and is the most important on the road.

THE CARNEGIE INSTITUTION.

In December, 1901, Andrew Carnegie offered the government of the United States \$10,000,000 for the establishment of a national university. Owing to the form in which the gift was made the offer was not at once accepted, but the difficulties were removed and in the first week of January, 1902, "The Carnegie Institution" was incorporated in Washington. After consultation with Mr. Carnegie the incorporators elected the following board of trustees:

William E. Dodge.	Seth Low.
John S. Billings.	Wayne MacVeagh.
William N. Frew.	D. O. Mills.
Lyman J. Gage.	S. Weir Mitchell.
Daniel C. Gilman.	W. W. Morrow.
John Hay.	Elihu Root.
Abram S. Hewitt.	John C. Spooner.
Henry L. Higginson.	Andrew D. White.
Henry Hitchcock.	Edward D. White.
C. L. Hutchinson.	Charles D. Walcott.
William Lindsay.	Carroll D. Wright.

EX-OFFICIO.

President of the United States.
President of the United States Senate.
Speaker of the House of Representatives.
Secretary of the Smithsonian Institution.
President of the National Academy of Sciences.

Daniel C. Gilman was elected president of the institution Jan. 29.

The purpose of the institution as formally explained by Mr. Carnegie is: It is proposed to found in the city of Washington, in the spirit of Washington, an institution which, with the co-operation of institutions now or hereafter established, there or elsewhere, shall, in the broadest and most liberal manner, encourage investigation, research and discovery; encourage the application of knowledge to the improvement of mankind; provide such buildings, laboratories, books and apparatus as may be needed, and afford instruction of

an advanced character to students whenever and wherever found, inside or outside of schools, properly qualified to profit thereby. Among its aims are these:

1. To increase the efficiency of the universities and other institutions of learning throughout the country by utilizing and adding to their existing facilities and by aiding teachers in the various institutions for experimental and other work in these institutions as far as may be advisable.

2. To discover the exceptional man in every department of study, whenever and wherever found, and enable him by financial aid to make the work for which he seems specially designed his life work.

3. To promote original research, paying great attention thereto as being one of the chief purposes of this institution.

4. To increase facilities for higher education.

5. To enable such students as may find Washington the best point for their special studies to avail themselves of such advantages as may be open to them in the museums, libraries, laboratories, observatory, meteorological, piscatorial and forestry schools and kindred institutions of the several departments of the government.

6. To insure the prompt publication and distribution of the results of scientific investigation—a field considered to be highly important.

These and kindred objects may be attained by providing the necessary apparatus for experimental work, by employing able teachers from the various institutions in Washington or elsewhere and by enabling men fitted for special work to devote themselves to it through salaried fellowships or through salaries with or without pensions in old age or through aid in other forms to such men as continue their special work at seats of learning throughout the world.

BRUSSELS SUGAR CONFERENCE.

By a convention signed at Brussels, Belgium, March 5, 1902, the sugar-producing countries of Europe agreed to abolish both direct and indirect bounties from Sept. 1, 1903, the agreement to stand five years, with renewal from year to year. Sweetmeats, chocolate, biscuits, condensed milk and analogous products which contain a notable proportion of sugar artificially incorporated are to be classed as sugar. The

object of the convention is to equalize the conditions of competition between beet and cane sugars from different sources and to promote the consumption of sugar by the suppression of all kinds of bounties and limitation of the surtax. A permanent commission to enforce the agreement is to sit at Brussels. The convention is to be ratified by the contracting powers on Feb. 1, 1903, or earlier if possible.

WORK OF THE SECOND PAN-AMERICAN CONGRESS.

The second Pan-American congress, which opened in the City of Mexico Oct. 23, 1901, came to a close Jan. 30, 1902. Some twenty projects were approved by the delegates. Among them were the following: The establishment of a Pan-American bank; the building of an international railroad; the holding of a custom-house congress for unifying and simplifying rules and methods of procedure; appointment of a commission of jurists to codify an international law; the adoption of treaties for international copyright and patent laws and for protection against anarchy; establishment of an international sanitary office to provide for

uniform quarantine regulations and sanitary policing; appointment of an international archaeological commission to meet once a year and to conduct explorations; reorganization of the Bureau of American Republics, and provision for the arbitration of international disputes.

The last-mentioned project occasioned a great deal of discussion, Chile being the principal objector. However, all the delegates voted to accept, on the part of the congress, the Hague convention.

It was also agreed that a third Pan-American conference should be held within five years, probably in Buenos Ayres.

GOVERNMENT POSITIONS AND CIVIL SERVICE.

According to the eighteenth annual report of the United States civil-service commission for the fiscal year ended June 30, 1901, there are in the entire executive service of the government, in round numbers, 235,000 places, of which about 121,000 are classified. Of the 114,000 remaining unclassified, 72,498 are those of fourth-class postmasters. The annual expenditures for salaries in the entire executive service is \$130,000,000, and of this \$85,000,000, or nearly

two-thirds, goes to salaries for positions subject to the civil-service rules.

From July 1, 1900, to June 30, 1901, 47,075 persons were examined for government positions. About 69 per cent of those taking examinations passed and the total number receiving appointment was 9,870, distributed as follows: Departmental, 3,933; railway mail, 816; Indian, 276; postoffice, 4,288; custom house, 302; government printing office, 172; internal revenue, 83.

DECLINE OF THE LUMBER INDUSTRY.

From statistics gathered by the American Lumberman it is more than ever apparent that the supply of northern pine is rapidly diminishing. In spite of an increased demand the total cut of Michigan, Wisconsin and Minnesota was less in 1901 than in 1900. The rise and decline of the lumber industry in the states named is shown in the following table:

RELEASE OF ELLEN M. STONE.

Miss Ellen M. Stone, the congregational missionary who, with Mme. Tsilka, was captured by brigands in the mountains of Turkish Macedonia Sept. 3, 1901, was released near the village of Strumilza, Macedonia, early on the morning of Feb. 23, 1902. About a week before that agents act-

ing on behalf of the American state department paid over to the men who had held her in captivity the sum of \$65,000 as a ransom. Miss Stone and her companion were suffering from fatigue and nervous strain when set at liberty but were otherwise in good physical condition.

NORTHERN SECURITIES COMPANY.

The Northern Securities company was incorporated in New Jersey Nov. 1, 1901, for the purpose of taking over and holding a majority of the stocks of the Northern Pacific and Great Northern Railroad companies. The authorized capital stock is \$400,000,000. James J. Hill is president of the company and the directors are Samuel Thorne, J. J. Hill, E. T. Nichols, D. W. James, Robert Bacon, G. F. Baker, George W. Perkins, Daniel S. Lamont, E. H. Harriman, James Stillman, J. H. Schiff, G. C. Clark, W. P. Clough, N. Terhune and J. S. Kennedy. The mileage of the roads practically merged under this arrangement is more than 19,000.

Feb. 19, 1902, President Roosevelt directed Attorney-General Knox to proceed against

the Northern Securities company, and on the 11th of March the government filed a bill to test the legality of the merger under the Sherman law of July 2, 1890, forbidding combinations in restraint of trade. May 5 the Securities company filed an answer to the effect that the company was simply a stockholder, that there was no conspiracy and no combination, and that the railroads were managed in the usual manner by the old boards.

Feb. 24 the Supreme court of the United States denied the application of the state of Minnesota to file a bill of complaint on the ground of not having jurisdiction. This decision did not in any way involve the merits of the case.

MERGER OF ATLANTIC STEAMSHIP LINES.

In January, 1902, the J. P. Morgan syndicate secured control of five Atlantic steamship lines and effected a combination which was incorporated at Trenton, N. J., Oct. 1 as the International Mercantile Marine company. Its capital stock was fixed at \$120,000,000, divided into \$60,000,000 6 per cent cumulative preferred stock and \$60,000,000 common. The lines included in the merger were the American, Red Star, Leyland, White Star and Atlantic Transport. The president

is Clement A. Griscom and the directors are C. A. Griscom, P. A. B. Widener, B. H. Baker, John J. Waterbury, E. J. Berwind, George W. Perkins, James H. Hyde, Charles Steele, W. J. Pirrie, J. B. Ismay, Sir Clinton E. Dawkins, Henry Wilding and Charles F. Torrey. An agreement was entered into with the German-American lines to work in harmony and to unite, if necessary, in opposition to competing companies.

TOBACCO-GROWING STATES.

Of the 868,163,275 pounds of tobacco produced in 1899 314,288,050 pounds were grown in Kentucky, 127,503,400 in North Carolina, 122,884,900 in Virginia, 65,957,100 in Ohio, 49-

157,550 in Tennessee, 45,500,480 in Wisconsin, 41,502,620 in Pennsylvania, 24,539,480 in Maryland and 16,930,770 in Connecticut.

FLAXSEED CROP OF THE WORLD.

The world's product of flaxseed in 1900 was 64,466,500 bushels, as against 61,726,600 bushels in 1899. The United States, according to commercial estimates, produced 20,-

000,000 bushels in 1900, or 86,000 bushels less than in 1899. The total flax fiber production of the world in 1900 was 1,312,709,000 pounds—all in Europe.

CORK PRODUCTION OF THE WORLD.

The French Journal Officiel estimates the cork production of the world at 2,204,000 pounds annually. Portugal, Spain, France, Italy, Tunis, Algeria and Morocco are the

only producing countries. In the fiscal year 1901 the United States imported cork wood and cork bark to the value of \$1,729,914 and manufactures of cork valued at \$541,083.

COFFEE CONSUMPTION OF THE UNITED STATES.

[Based on data compiled by the statistician of the department of agriculture.]

In the calendar year 1901 the total importation of coffee into the United States amounted to 1,072,009,182 pounds, valued at \$70,151,044. This is far in excess of the quantity taken annually by any other country in the world. In round figures, Germany buys \$40,000,000 worth of coffee each year, France \$20,000,000 and the united kingdom \$13,000,000. The per capita consumption in Holland and Denmark is greater than in the United States but the total quantity is, of course, very much less. The appended table shows the imports of coffee into the United States for a term of years and the total coffee crop of the world for the same time.

GROSS AREA OF THE UNITED STATES.

Including Alaska, Hawaii, Porto Rico and the Philippine islands, the gross area (land and water surface) of the United States is approximately 3,622,933 square miles. Excluding Alaska and the islands named, the gross area at each census from 1790 to 1900 compares as follows:

*Exclusive of Alaska and Hawaii.

Area of Porto Rico is approximately 3,600 and of the Philippine islands 114,000 square miles. NOTE—The areas as given above were computed under the direction of Henry Gannett, geographer of the United States geological survey, for the census office. In some cases the figures vary from those given by the general land office, but they are believed to be as nearly correct as possible. In the case of states bordering on the great lakes the water surface of the latter has been included in the computation of areas by the land office and excluded by Mr. Gannett. This will account in large measure for the apparent discrepancies.

LARGEST SAILING VESSELS.

The largest sailing vessel in the world is the schooner Thomas W. Lawson, launched at Quincy, Mass., July 10, 1902. The ship carries seven masts, each 155 feet high,

and has a carrying capacity of 8,100 tons. The next largest sailing vessel is the five-masted 8,000-ton ship Prussian, launched at Geestemunde, Germany, May 7, 1902.

CENTER OF POPULATION AND ITS MEDIAN POINT.

The center of population is the center of gravity of the population of the country, each individual being assumed to have the same weight. What is known as the median point is the point of intersection of the line dividing the population equally north and south with the line dividing it equally east and west. The center of population in 1900 was at a point six miles southeast of Columbus, Ind., or north latitude 39 degrees and 9.5 minutes and west longitude 85 degrees 48.9 minutes. The median point in 1900 was at Spartanburg, Ind., or latitude 40 degrees 4 minutes and 22 seconds and longitude 84 degrees 51 minutes and 29 seconds.

The center of area of the United States, excluding Alaska and Hawaii and other recent accessions, is in northern Kansas, in approximate latitude 39 degrees 55 minutes and approximate longitude 98 degrees 50 minutes. The center of population is therefore about three-fourths of a degree south and more than thirteen degrees east of the center of area.

*McDonough and Schuyler reported together and credited to Schuyler in 1830. Peoria and Putnam reported together and credited to Putnam in 1830.

†Madison county at one time occupied half the northern part of the state. It was greatly reduced in size between 1820 and 1830.

Of the 102 counties in the state all but six increased in population during the decade 1890-1900, the counties showing the largest percentages of increase being Cook, 54.2 per cent; Lake, 42.3 per cent; Rock Island, 31.3 per cent; Vermilion, 31.5 per cent; St. Clair, 30.2 per cent; Boone, 29.4 per cent; Kankakee, 29.3 per cent, and Pulaski, 28.1 per cent.

The six counties showing a decrease are Brown, Greene, Jersey, Jo Daviess, Kendall and Pope.

DEATH RATE IN THE UNITED STATES.

Census year ended May 31, 1900.

From the tables prepared by W. A. King, chief statistician for vital statistics, it appears that in the registration areas, or those parts of the country furnishing complete and reliable data, there has been a decrease in the general death rate since 1890 of 1.8 per 1,000 of population. In 1890 the rate in cities of 5,000 or more population was 21 per 1,000; in 1900 the death rate was 18.6 in cities of 8,000 or more population, showing a decrease of 2.4 per 1,000.

The following table shows the death rate per 1,000 in cities having 100,000 or more population:

THE CECIL RHODES SCHOLARSHIP.

Cecil Rhodes, the South African capitalist and "empire builder," died at Cape Town March 26, 1902, leaving a fortune roughly estimated at about \$30,000,000. By the terms of his will, made public April 4, an endowment amounting to \$10,000,000 was to be set aside for the foundation of sixty Oxford university scholarships for England and the British colonies and nearly 100 scholarships for the United States, or two for each state and territory in the union. These scholarships have a yearly value of \$1,500 each and are tenable for three years. Fifteen scholarships for students in Germany were also provided for. The sum of \$500,000 was left to Oriel college, Oxford.

The requirements for election to these scholarships are thus set forth in the will: "I direct that in their election regard shall be had to their literary and scholastic attainments and fondness for and success in manly outdoor sports, and their qualities of

manhood, truth, courage, devotion to duty, sympathy for and protection of the weak, kindliness, unselfishness and fellowship exhibited during their school days, moral force, character and instinct to lead and to take interest in their schoolmates:

"As suggestions for the guidance of those having the selection of the scholarships my idea of a qualified student would combine these four qualifications in the proportion of three-tenths for the first, literary; two-tenths for the second, fondness of song; three-tenths for the third, the qualities of manhood, and two-tenths for the fourth, exhibition of moral force."

The desire of the testator to encourage the union of the English-speaking people is given as the reason for founding the American scholarships.

The executors and trustees of the estate are Lord Rosebery, Earl Grey, Lord Milner, Alfred Beit, Dr. L. S. Jameson, L. L. Mitchell and B. F. Hawksley.

WORLD'S SUBMARINE AND LAND TELEGRAPH SYSTEMS.

[Data collected by O. P. Austin, chief of bureau of statistics, Washington, D. C.]

GENERAL INFORMATION.

Length of Direct United States cable (Baltimore, Ireland, to Halifax, N. S.), 2,564 miles.

Length of French cable (Brest, France, to Cape Cod, Massachusetts), 3,250 miles.

Depth of Atlantic cable lines, 14,000 feet.

Depth Haiti-Windward islands line, 18,000 feet.

Greatest depth of proposed cable between San Francisco and Manila, 19,600 feet.

Capital of first Atlantic cable company, \$1,750,000.

Contract price of first successful Atlantic cable, \$3,000,000.

Present cost per mile of cable (estimated by Bright), \$750.

Average cost of laying cable, per mile, \$375.

Number of words per minute sent on first successful Atlantic cable, 8; after experimental stage, 15; present speed without duplex, 25; by automatic system, without du-

plex, 50; increased use of wire by duplexing, 90 per cent.

Number of cables laid across north Atlantic, 16; now working, 13.

Average life of cable, 25 years.

Original word rate across Atlantic, \$1; present rate, 25 cents.

Length of cable lines of the world, 193,000 miles.

Length of land lines of the world, 662,000 miles.

Cost of cable lines of the world, \$250,000,000.

Cost of land lines of the world, \$310,000,000.

Total length of land and cable wires, 2,300,000 miles.

Number of cable messages sent annually, 6,000,000.

Number of cables owned by nations, 1,380; length, 21,523.

Number of cables owned by private companies, 370; length, 171,679.

CABLES BEGUN OR PROJECTED IN 1902.

The Commercial Pacific Cable company was authorized by the president of the United States Aug. 9, 1902, to lay a cable from the Pacific coast of the United States to Hawaii, Guam and the Philippine islands and the Asiatic coast, with a branch from Guam to Japan. This cable is to touch at

no other than American territory on the way from the United States to the Chinese empire. The government has the right to buy the lines whenever it so desires, or to take possession of them in event of war.

The construction of a cable from British Columbia to Australasia is under way.

TALLEST BUILDING IN THE WORLD.

The Syndicate building, Park row, New York, is said to be the highest in the world.

It is 346 feet from curb to cornice and has twenty-seven stories, one below ground.

Patriotic Societies of the United States.

SOCIETY OF THE CINCINNATI.

(Organized June 24, 1783; incorporated Feb. 24, 1814.)

GENERAL OFFICERS.

President—Gen. Winslow Warren, Massachusetts.
 Vice-President—Gen. James Simons, South Carolina.
 Secretary—Gen. Asa Bird Gardiner, Rhode Island.
 Treasurer—Gen. F. W. Jackson, New Jersey.
 Assistant Treasurer—Gen. John Cropper, Virginia.

Only the thirteen original states have state societies. These, with names of president and secretary of each in the order named, are:

New Hampshire—John Gardner Gilman, F. Bacon Philbrook.
 Massachusetts—Winslow Warren, David Greene Haskins.
 Rhode Island—Asa Bird Gardiner, George W. Olney.
 Connecticut—George B. Sanford, Morris W. Seymour.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names, as well as the services, of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

UNITED STATES MILITARY ACADEMY.

(West Point, N. Y.)

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. Upon completing the course satisfactorily, cadets are eligible for promotion and commission as second lieutenants in any arm or corps of the army in which there may be a vacancy, the duties of which they may have been judged competent to perform. The total number of graduates from 1802 to 1902 inclusive is

4,121. The maximum number of cadets at present permitted by law is 521. The corps of cadets consists of one from each congressional district, one from each territory, one from the District of Columbia, two from each state at large and forty from the United States at large, all appointed by the president. Col. Albert L. Mills is superintendent, Capt. William C. Rivers adjutant and Maj. John B. Bellinger quartermaster.

THE MONROE DOCTRINE.

The famous "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. * * *

We owe it, therefore, to candor and to the

amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

APPLICATIONS FOR PATENTS.

[Condensed from Rules of Practice in the United States patent office.]

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof not previously patented or described in this or any other country, or more than two years prior to his application, unless the same is proved to have been abandoned. A patent may also be obtained for any new design for a manufacture, bust, statue, alto-relievo or bas-relief; for the printing of woolen, silk or other fabrics; for any new impression, ornament, pattern, print or picture to be placed on or woven into any article of manufacture; and for any new, useful and original shape or configuration of any article of manufacture, upon payment of fees and taking the other necessary steps.

Applications for patents must be in writing, in the English language and signed by the inventor if alive. The application must include the first fee of \$15, a petition, specification and oath, and drawings, model or specimen when required. The petition must be addressed to the commissioner of patents and must give the name and full address of the applicant, must designate by title the invention sought to be patented, must contain a reference to the specification for a full disclosure of such invention and must be signed by the applicant.

The specification must contain the following in the order named: Name and residence of the applicant with title of invention; a general statement of the object and nature of the invention; a brief description of the several views of the drawings (if the invention admits of such illustration); a detailed description; claim or claims; signature of inventor and signatures of two witnesses. Claims for a machine and its product and claims for a machine and the process in the performance of which the machine is used must be presented in separate applications, but claims for a process and its product may be presented in the same application.

The applicant, if the inventor, must make oath or affirmation that he believes himself to be the first inventor or discoverer of that which he seeks to have patented. The oath or affirmation must also state of what country he is a citizen and where he resides. In every original application the applicant must swear or affirm that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any

foreign country by himself or his legal representatives or assigns more than seven months prior to his application. If application has been made in any foreign country full and explicit details must be given. The oath or affirmation may be made before any one who is authorized by the laws of his country to administer oaths.

Drawings must be on white paper with india ink and the sheets must be exactly 10x15 inches in size with a margin of one inch. They must show all details clearly and without the use of superfluous lines.

Applications for reissues must state why the original patent is believed to be defective and tell precisely how the errors were made. These applications must be accompanied by the original patent and an offer to surrender the same; or, if the original be lost, by an affidavit to that effect and certified copy of the patent. Every applicant whose claims have been twice rejected for the same reasons may appeal from the primary examiners to the examiners in chief upon the payment of a fee of \$10.

The duration of patents is for seventeen years except in the case of design patents, which may be for three and a half, seven or fourteen years as the inventor may elect.

Caveats or notices given to the patent office of claims to inventions to prevent the issue of patents to other persons upon the same invention, without notice to the caveators, may be filed upon the payment of a fee of \$10. Caveats must contain the same information as applications for patents.

THE ISTHMIAN CANAL.

BILL PASSED BY CONGRESS.

On the 9th of January, 1902, the house of representatives passed a bill providing for the construction of a canal across the isthmus at Nicaragua. The vote was practically unanimous, standing 308 yeas to 2 nays. In the senate after a long discussion the Spooner bill, giving the preference to the Panama route, was passed June 19 by a vote of 42 yeas to 34 nays. The substitute was accepted by the house June 26 and signed by the president June 28. Following is the text of the law:

"Be it enacted by the senate and house of representatives of the United States in congress assembled, that the president of the United States is hereby authorized to acquire for and on behalf of the United

tending from the Caribbean sea to the Pacific ocean, and the right to use and dispose of the water thereon and to excavate, construct and perpetually to maintain, operate and protect thereon a canal of such depth and capacity as will afford convenient passage of ships of the greatest tonnage and draft now in use from the Caribbean sea to the Pacific ocean, which control shall include the right perpetually to maintain and operate the Panama railroad, if the ownership thereof or a controlling interest therein shall have been acquired by the United States, and also jurisdiction over said strip and the ports at the ends thereof, to make such police and sanitary rules and regulations as shall be necessary to preserve order and preserve the public

States, at a cost not exceeding \$40,000,000, the rights, privileges, franchises, concessions, grants of land, right of way, unfinished work, plants and other property, real, personal and mixed, of every name and nature, owned by the New Panama Canal company of France on the isthmus of Panama, and all its maps, plans, drawings, records, on the isthmus of Panama and in Paris, including all the capital stock, not less, however, than 63,863 shares of the Panama Railroad company, owned by or held for the use of said canal company, provided a satisfactory title to all of said property can be obtained.

"Section 2. That the president is hereby authorized to acquire from the republic of Colombia for and on behalf of the United States, upon such terms as he may deem reasonable, perpetual control of a strip of land, the territory of the republic of Colombia, not less than six miles in width, ex-

health thereon, and to establish such judicial tribunals as may be agreed upon thereon as may be necessary to enforce such rules and regulations.

"The president may acquire such additional territory and rights from Colombia as in his judgment will facilitate the general purpose thereof.

"Section 3. That when the president shall have arranged to secure a satisfactory title to the property of the New Panama Canal company, as provided in section 1 hereof, and shall have obtained by treaty control of the necessary territory from the republic of Colombia, as provided in section 2 hereof, he is authorized to pay for the property of the New Panama Canal company \$40,000,000 and to the republic of Colombia such sum as shall have been agreed upon, and a sum sufficient for both said purposes is hereby appropriated out of any money in the treasury not other-

wise appropriated, to be paid on warrant or warrants drawn by the president.

"The president shall then through the isthian canal commission hereinafter authorized cause to be excavated, constructed and completed, utilizing to that end as far as practicable the work heretofore done by the New Panama Canal company of France and its predecessor company, a ship canal from the Caribbean sea to the Pacific ocean. Such canal shall be of sufficient capacity and depth as shall afford convenient passage for vessels of the largest tonnage and greatest draft now in use and such as may be reasonably anticipated,

same for vessels of the largest tonnage and greatest draft now in use and such as may be reasonably anticipated, and shall be supplied with all necessary locks and other appliances to meet the necessities of vessels passing through the same from ocean to ocean, and he shall also construct such safe and commodious harbors at the termini of said canal as shall be necessary for the safe and convenient use thereof, and shall make such provisions for defense as may be necessary for the safety and protection of said harbors and canal, and such sum or sums of money as may be agreed upon by such treaty as compensa-

and shall be supplied with all necessary locks and other appliances to meet the necessities of vessels passing through the same from ocean to ocean, and he shall also cause to be constructed such safe and commodious harbors at the termini of said canal and make such provisions for defense as may be necessary for the safety and protection of said canal and harbors. That the president is authorized for the purposes aforesaid to employ such persons as he may deem necessary and to fix their compensation.

"Section 4. That should the president be unable to obtain for the United States a satisfactory title to the property of the New Panama Canal company and the control of the necessary territory of the republic of Colombia and the rights mentioned in sections 1 and 2 of this act within a reasonable time and upon reasonable terms, then the president, having first ob-

tion to be paid to Nicaragua and Costa Rica for the concessions and rights hereunder provided to be acquired by the United States are hereby appropriated out of any money in the treasury not otherwise appropriated, to be paid on warrant or warrants drawn by the president.

"The president shall cause the said isthian canal commission to make such surveys as may be necessary for said canal and harbors to be made, and in making such surveys and in the construction of said canal may employ such persons as he may deem necessary and may fix their compensation.

"In the excavation and construction of said canal the San Juan river and Lake Nicaragua or such parts of each as may be made available shall be used.

"Section 5. That the sum of \$10,000,000 is hereby appropriated, out of any money in the treasury not otherwise appropriated,

PLAN AND SECTION OF THE PANAMA CANAL.

tained for the United States perpetual control by treaty of the necessary territory from Costa Rica and Nicaragua upon terms which he may consider reasonable for the construction, perpetual maintenance, operation and protection of a canal connecting the Caribbean sea with the Pacific ocean by what is commonly known as the Nicaragua route, shall through the said isthian canal commission cause to be excavated and constructed a ship canal and waterway from a point on the shore of the Caribbean sea near Greytown, by way of Lake Nicaragua, to a point near Brito on the Pacific ocean. Said canal shall be of sufficient capacity and depth to afford convenient pas-

sage toward the project herein contemplated by either route so selected.

"And the president is hereby authorized to cause to be entered into such contract or contracts as may be deemed necessary for the proper excavation, construction, completion and defense of said canal, harbors and defenses by the route finally determined upon under the provisions of this act. Appropriations therefor shall from time to time be hereafter made not to exceed in the aggregate the additional sum of \$135,000,000 should the Panama route be adopted, or \$180,000,000 should the Nicaragua route be adopted.

"Section 6. That in any agreement with

the republic of Colombia or with the states of Nicaragua and Costa Rica the president is authorized to guarantee to said republic or to said states the use of said canal and harbors, upon such terms as may be agreed upon, for all vessels owned by said states or by citizens thereof.

"Section 7. That to enable the president to construct the canal and works appurtenant thereto as provided in this act there is hereby created the isthmian canal commission, the same to be composed of seven members, who shall be nominated and appointed by the president, by and with the advice and consent of the senate, and who shall serve until the completion of said canal, unless sooner removed by the president, and one of whom shall be named as chairman of said commission. Of the seven members of said commission at least four shall be persons learned and skilled in the science of engineering, and of the four at least one shall be an officer of the United States army and at least one other shall be an officer of the United States navy, the said officers respectively being either upon the active or the retired list of the army or of the navy. Said commissioners shall each receive such compensation as the president shall prescribe until the same shall have been otherwise fixed by the congress. In addition to the members of the said isthmian canal commission the president is hereby authorized through said commission to employ in said service any of the engineers of the United States army at his discretion and likewise to employ any engineers in civil life at his discretion and any other persons necessary for the proper and expeditious prosecution of said work. The compensation of all such engineers and other persons employed under this act shall be fixed by said commission, subject to the approval of the president. The official salary of any officer appointed or employed under this act shall be deducted from the amount of salary or compensation provided by or which shall be fixed under the terms of this act. Said commission shall in all matters be subject to the direction and control of the president and shall make to the president annually and at such other periods as may be required, either by law or by order of the president, full and complete reports of all their actings and doings and of all moneys received and expended in the construction of said work and in the performance of their duties in connection therewith, which said reports shall be by the president transmitted to congress. And the said commission shall furthermore give to congress, or either house of congress, such information as may at any time be required either by act of congress or by the order of either house of congress. The president shall cause to be provided and assigned for the use of the commission such offices as may, with the suitable equipment of the same, be necessary and proper in his discretion for the proper discharge of the duties thereof.

"Section 8. That the secretary of the treasury is hereby authorized to borrow on the credit of the United States from time to time, as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditures), the sum of \$130,000,000 or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States in such

form as he may prescribe and in denominations of \$20 or some multiple of that sum, redeemable in gold coin at the pleasure of the United States after ten years from date of their issue and payable thirty years from such date, and bearing interest payable quarterly in gold coin at the rate of 2 per centum per annum, and the bonds herein authorized shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal or local authority. Provided, that said bonds may be disposed of by the secretary of the treasury at not less than par under such regulations as he may prescribe, giving to all citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon, and a sum not exceeding one-tenth of 1 per centum of the amount of the bonds herein authorized is hereby appropriated out of any money in the treasury not otherwise appropriated to pay the expense of preparing, advertising and issuing same.

"Approved, June 28, 1902."

REPORT OF CANAL COMMISSION.

The action of congress in passing the Spooner substitute for the Nicaragua canal bill adopted by the house resulted directly from a supplementary report made by the isthmian canal commission on the 18th of January, 1902. In its first report, made Nov. 16, 1901, the commission recommended the Nicaragua route chiefly because the price asked for the concessions, property and rights of the French Panama Canal company was considered unreasonable. When on the 4th of January, 1902, the company offered to sell for \$40,000,000, this objection was removed and after brief consideration the commission announced that in its opinion "the most practicable and feasible route" for an isthmian canal to be under the control, management and ownership of the United States was that known as the Panama route.

In comparing the Nicaragua and Panama routes the commission cited the advantages and disadvantages of each substantially as follows: In each case a canal with locks would be required; the water-supply features were satisfactory on both lines; both dams by which the summit levels would be sustained were practicable, while the plan of regulating the summit level on the Panama route was simpler than that on the other; the absence of harbors on the Nicaragua line would make the period of preparation longer than on the Panama line, where harbors are already in existence and where a railroad is in operation along the whole route.

The Panama route is 49.09 miles long and 134.6 miles shorter than the Nicaragua route from sea to sea, with fewer locks and less curvature both in degrees and miles. The estimated time for a deep-draft vessel to pass through the Nicaragua canal was placed at thirty-three hours, as against twelve hours for Panama, these estimates being the time of actual navigation and not including delays for winds, currents or darkness.

If the passage were made without interruption about a day could be saved by the Nicaragua over the Panama route by ordinary steamers handling commerce between Pacific ports and all Atlantic ports, and about two days by steamers of the same class trading between gulf ports and north

Pacific ports. The time advantage of the Nicaragua route would be less in the case of fast high-powered steamers, the use of which is increasing.

Between Atlantic ports and the west coast of South America the Panama route has the advantage of about two days, and between the gulf ports and the west coast of South America the Panama route has the advantage of about one day. The trade of the western coast of South America is a very important one, which has hitherto been in European hands. It was also the sense of the commission that the total time required for the construction of the canal by the Panama route would be ten years and eight years by the Nicaragua route, with a greater probability of exigencies causing delays on the latter than on the former.

The offer received from the New Panama Canal company to convey all its property, including all its interest in the Panama railroad, to the United States will make the estimated cost of the two canals as follows:

Nicaragua	\$189,864,062
Panama	184,222,358

The estimated annual cost of maintenance and operation is \$1,300,000 greater at Nicaragua than at Panama.

The value of the property offered by the French company was estimated by the commission to be:

Excavation done.....	\$27,474,033
Panama railroad stock at par.....	6,886,300
Maps, drawings and records.....	2,000,000

	\$36,360,333
Add 10 per cent to cover omissions	3,639,667

Total	\$40,000,000
-------------	--------------

The commission making the report consisted of Rear-Admiral J. G. Walker, Samuel Pasco, Alfred Noble, George S. Morrison, Peter C. Hains, William H. Burr, O. H. Ernst, Lewis M. Haupt and Emory R. Johnson.

PANAMA TITLE VALID.

Attorney-General Knox, in a report made public Oct. 25, decided that if the United States should accept the offer of the New Panama Canal company to sell the canal

for \$40,000,000 it would receive through the parties in interest a valid and unincumbered title to the property. This conclusion was arrived at after a thorough and exhaustive examination of the situation in Paris, first by a special attorney, Charles W. Russell, and later by the attorney-general himself.

DISTANCES VIA PANAMA.

New York to San Francisco, 5,299 nautical miles; to Yokohama, via Honolulu, 10,087; to Shanghai, via Honolulu, 11,007; to Guayaquil, 2,864.

New Orleans to San Francisco, 4,698 miles; to Yokohama, via Honolulu, 9,486; Shanghai, via Honolulu, 10,406; to Guayaquil, 2,263.

Liverpool to San Francisco, 8,038 miles; to Yokohama, via Honolulu, 12,826; to Shanghai, via Honolulu, 13,746; to Guayaquil, 5,603.

TEHUANTEPEC ISTHMUS RAILWAY.

The Tehuantepec Isthmus National railway across Mexico is 190 miles in length from ocean to ocean. Work on the line has been rapidly pushed by the contractors, who expect to complete it in the latter part of 1903 or the first of 1904. They also expect to finish the harbor works at each end at about the same time. The cost of the railroad improvements will be \$3,000,000. The work at Salina Cruz consists of a breakwater or sea wall and that on the gulf side of extensive dredging. The Pacific port will then accommodate ten vessels along the sea wall, while thirty or forty vessels will easily ride in the Coatzacoalcas harbor. When the entire work is completed cargo can be taken from ship's tackle to ship's tackle, from the Atlantic to the Pacific, in twenty-four hours.

The distance in statute miles from American and English ports to San Francisco and the orient by the Tehuantepec isthmus road and the Panama railroad is estimated by the hydrographic office to be:

<i>Tehuantepec Panama</i>	
New York to San Francisco.....	4,925 6,107
New York to Honolulu.....	6,566 7,705
New York to Hongkong.....	11,597 12,645
New York to Yokohama.....	9,984 11,211
New York to Melbourne.....	11,068 11,471
Liverpool to San Francisco.....	8,274 9,071
New Orleans to Acapulco.....	1,454 3,296
New Orleans to Mazatlan....	2,027 3,983

DIET FOR FLESHY PERSONS.

Following is a list of articles of food which persons inclined to stoutness or obesity must avoid if they do not wish to take on more flesh: Soups, sausage, fats, made dishes, potatoes, macaroni, salmon, salt fish, bluefish, eels, pork, veal, oatmeal, hominy, rice, beets, carrots, cream, parsnips, puddings, pastry, cake, sugars, sweets, malt or spirituous liquors, beers, sweet wines and champagne.

Articles of food which may be taken: Fresh fish, boiled; sweetbreads, chicken,

turkey, lean beef, mutton or lamb, tongue, oysters, clams, cheese, boiled or poached eggs, stale bread, dry toast or crusts, rusks, zwiebach, spinach, lettuce, onions, cabbage, asparagus, celery, cauliflower, radishes, olives, pineapple, lemons and sour apples. In the way of drinks one cup of coffee or tea without milk or sugar or cream or one glass of pure water taken slowly at the end of the meal is allowable.

Lean persons who desire to gain in flesh will of course reverse the programme.

SHIPBUILDING ON THE CLYDE.

There are fifty shipbuilding yards on the Clyde, Scotland. In 1901 they launched 298 vessels having a total tonnage of 551,214, as against 486,079 tons in 1900, 491,074 in 1899

and 466,832 in 1898. Of the ships built in 1901, eighty-four were sailing vessels, mostly yachts and barges, and the remainder steam craft.

ANGLO-JAPANESE AGREEMENT.

TEXT OF THE TREATY.

The governments of Great Britain and Japan, actuated solely by a desire to maintain the status quo and general peace in the extreme east, being, moreover, specially interested in maintaining the independence and territorial integrity of the empire of China and the empire of Korea, and in securing equal opportunities in those countries for the commerce and industry of all nations, hereby agree as follows:

Article 1. The high contracting parties having mutually recognized the independence of China and of Korea, declare themselves to be entirely uninfluenced by any aggressive tendencies in either country. Having in view, however, their special interests, of which those of Great Britain relate principally to China, while Japan, in addition to the interests which she possesses in China, is interested in a peculiar degree politically, as well as commercially and industrially, in Korea, the high contracting parties recognize that it will be admissible for either of them to take such measures as may be indispensable in order to safeguard those interests if threatened either by the aggressive action of any other power or by disturbances arising in China or Korea, and necessitating the intervention of either of the high contracting parties for the protection of the lives and property of its subjects.

Article 2. If either Great Britain or Japan, in the defense of their respective interests as above described, should become involved in war with another power, the other high contracting party will maintain a strict neutrality and use its efforts to prevent other powers from joining in hostilities against its ally.

Article 3. If in the above event any other power or powers should join in hostilities against that ally the other high contracting party will come to its assistance and will conduct the war in common and make peace in mutual agreement with it.

Article 4. The high contracting parties agree that neither of them will, without consulting the other, enter into separate arrangements with another power to the prejudice of the interests above described.

Article 5. Whenever, in the opinion of either Great Britain or Japan, the above-mentioned interests are in jeopardy, the two governments will communicate with one another fully and frankly.

Article 6. The present agreement shall come into effect immediately after the date of its signature and remain in force for five years from that date.

In case neither of the high contracting parties should have notified twelve months before the expiration of the said five years the intention of terminating it, it shall remain binding until the expiration of one year from the day on which either of the

high contracting parties shall have denounced it. But if, when the date fixed for its expiration arrives, either ally is actually engaged in war, the alliance shall, ipso facto, continue until peace is concluded.

In faith whereof the undersigned, duly authorized by their respective governments, have signed this agreement and have affixed thereto their seals.

Done in duplicate at London, the 30th of January, 1902.

LANSDOWNE.
HAYASHI.

POLICY OF THE UNITED STATES.

Feb. 1, 1902, Secretary of State John Hay sent an identical note to Russia and Japan asserting that an agreement whereby China gives any corporation or company the exclusive right or privilege of opening mines, establishing railroads or in any other way industrially developing Manchuria could but be viewed with the gravest concern by the government of the United States. Such an agreement would be in violation of pledges given by Russia to follow the policy of the open door in China, would seriously affect the rights of American citizens and imperil China's sovereignty in this part of the empire.

This note coming two days after the conclusion of the Anglo-Japanese treaty of alliance was interpreted to mean that the United States, while in thorough sympathy with the principles involved in the treaty, preferred to act independently, thus following out the traditional policy of avoiding entangling alliances. The treaty was made public Feb. 11 and the American identical note Feb. 19.

FRANCO-RUSSIAN AGREEMENT.

On the 16th of March Russia and France sent the following joint note to the powers: "The allied Russo-French governments are wholly pleased to discern that the Anglo-Japanese convention supports the essential principles which, according to the reiterated statement of France and Russia, constituted and still constitute the foundation of their policy. Both governments believe that the support of these principles is also a guaranty of their interests in the far east."

"They are compelled, however, not to lose from view the possible inimical action of other powers, or a repetition of the disorders in China, possibly impairing China's integrity and free development to the detriment of their reciprocal interests. They therefore reserve to themselves the right to take measures to defend these interests."

In a prefatory statement it is declared that Russia desires the maintenance of the made at Briesen after the trip had lasted 7 hours and 30 minutes.

HIGHEST BALLOON ASCENT.

What is believed to be the highest balloon ascent on record was made by Dr. R. Suring of the Royal Meteorological Institute, Berlin, and Mr. Berson, the aeronaut, on the 31st of July, 1901. The start was made from Berlin early in the morning in a balloon 80 feet in diameter, 260 feet in circumference, weighing 2,000 pounds and containing 300,000 cubic feet of gas. The measured height attained was 35,000 feet, but

the actual height was about 1,000 feet more than that. Dr. Suring became unconscious, but his companion retained sufficient strength to pull the valve and cause the balloon to descend. At the highest altitudes both aeronauts used stored oxygen for breathing purposes. The descent was made at Briesen after the trip had lasted 7 hours and 30 minutes.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year or by both said punishments, in the discretion of the court.

Section 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Section 3. Every contract, combination in form of trust or otherwise, or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year or by both said punishments, in the discretion of the court.

Section 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act, and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such

proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Section 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Section 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Section 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Section 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

ILLINOIS ANTITRUST LAW.

The essential portion of the act approved June 11, 1891, as amended by the act approved June 10, 1897, for the punishment of persons, copartnerships or corporations forming pools, trusts and combines is as follows:

"If any corporation organized under the laws of this or any other state or country for transacting or conducting any kind of business in this state or any partnership or individual or other association of persons whosoever shall create, enter into, become a member of or a party to any pool, trust, agreement, combination, confederation or understanding with any other corporation, partnership, individual or other person or association of persons, to regulate or fix the price of any article of merchandise or commodity, or shall enter into, become a member of or party to any pool, agreement, contract, combination or confederation to fix or limit the amount or quantity of any article, commodity or merchandise to be manufactured, mined, produced or sold in

this state, such corporation, partnership or individual or other association of persons shall be deemed and adjudged guilty of a conspiracy to defraud and be subject to indictment and punishment as provided in this act: Provided, however, that in the mining, manufacture or production of articles of merchandise, the cost of which is mainly made up of wages, it shall not be unlawful for persons, firms or corporations doing business in this state to enter into joint arrangements of any sort, the principal object or effect of which is to maintain or increase wages."

The punishment for the first violation of this act by a corporation is fixed by a fine of not less than \$500 nor more than \$2,000; for the second offense not less than \$2,000 nor more than \$5,000; for a third offense not less than \$5,000 nor more than \$10,000. Any individual convicted of violating the act may be punished by a fine of not less than \$200 nor more than \$1,000 or by confinement in the county jail not to exceed one year, or both,

DISASTERS IN MARTINIQUE AND ST. VINCENT.

St. Pierre, the chief city of the island of Martinique, in the Lesser Antilles, was totally destroyed by an eruption of the volcano Mont Pelee on the 8th of May, 1902. The inhabitants, numbering about 25,000, were killed almost instantly. One man confined in a dungeon and a very few others who were on the seashore were the sole survivors. All the shipping in the harbor with the exception of the steamer Roddam was destroyed. The Roddam managed to get to sea with most of those on board dead and the remainder badly crippled. Several villages and many plantations in the vicinity of the volcano were also overwhelmed. The total loss of life on the island of Martinique was officially estimated at 30,000.

Mont Pelee had been inactive for many years, but on the 3d of May it began to throw out dense clouds of smoke and steam. Detonations and subterranean rumblings were heard and fine gray ashes began to fall. The first loss of life occurred on the plantation Guerin on the 5th of May and a general exodus of the people of St. Pierre was prevented only by using the military.

On the morning of the 8th of May a few minutes before 8 o'clock a great cloud of black ashes and steam shot out from the summit of the mountain, followed immediately by a similar outburst from another crater about 1,500 feet lower down in the direction of St. Pierre. Jets of fire issued from both vents and succeeding the flame came the sound of loud detonations. The clouds at first rose and spread out, then descended, while flashes of what seemed to be lightning unaccompanied by thunder played about the summit. The mass of smoke and vapor from the lower crater followed the slope of the mountain and rushed upon St. Pierre with the speed of a tornado. At the same time the gas or gases of which the cloud was in part composed became ignited and in the explosion which took place the whole city was leveled with the ground. The inhabitants had no chance to escape. They were either crushed to death under the debris of the stone buildings or were burned to death by the flaming gas.

Contrary to the first reports there was no fall of lava and the city was not overwhelmed by volcanic mud. The ashes, which fell in great abundance, did no harm to human life, nor did the earthquakes preceding the eruption result in any damage beyond causing the submarine cables to snap. The destruction, according to the report of Robert T. Hill and other scientists who investigated the matter, was wrought entirely by the explosion of a gas the precise nature of which they could not ascertain.

Within a few days after the disaster the authorities gathered up the remains of such of the victims as were not buried too deeply in the ruins and burned them. The few wounded survivors, most of whom were picked up by the French warship Suchet at points on the coast near St. Pierre, were conveyed to Fort de France. Food and clothing in large quantities were sent from the United States and other countries with the result that there was no suffering for the necessities of life. The American congress appropriated \$200,000 for relief purposes.

Another eruption of Mont Pelee, even more violent than that of May 8, took place at 9:10 o'clock on the evening of Aug. 30.

The area of destruction involved Morne Rouge, Haute Tours de Boudon, Basse Pointe, Morne Balai and Ajoupa Bouillon. The village of Le Carbet was overwhelmed by a tidal wave. The total loss of life was 1,060. All the phenomena of the first great eruption were repeated in the second.

Simultaneously with the eruption of Mont Pelee the volcano known as La Soufriere on the British island of St. Vincent, which is adjacent to Martinique on the south, became violently active and emitted great quantities of ashes and steam and gas, causing explosions similar to those which destroyed St. Pierre. The exact number of lives lost on the plantations and in the villages near the mountain was never accurately determined, but it is thought to have been in the vicinity of 1,600. Many of the victims were Caribs, a picturesque tribe of native Indians which was practically wiped out of existence. The ashes fell in large quantities all over the island and for a time it was feared that the cities of Kingstown and Georgetown would be destroyed, but they escaped all damage.

OTHER ERUPTIONS AND EARTHQUAKES IN 1902.

Jan. 16—Earthquake partially destroys the city of Chilpancingo, in the state of Guerrero, Mexico; many lives lost by collapse of a church. Shocks felt in City of Mexico on same day.

24—Two shocks of earthquake felt in St. Louis.

Feb. 14—Shamaka, Transcaucasia, destroyed by an earthquake and volcanic eruption; loss of life estimated at 5,000; houses destroyed, 4,000.

March 4—Tidal waves on coast of Central America at Acajutla cause the death of many persons; fifty-three bodies recovered.

10—New Hebrides shaken.

12—Kyankari, Asia Minor, destroyed by earthquake; four killed, 100 injured.

The Academie Française, or French academy, was instituted in 1635. It is a part of the Institute of France, and its particular function is to conserve the French language, foster literature and encourage genius. The members are forty in number and are popularly known as the "forty immortals."

PRINCE HENRY'S VISIT TO THE UNITED STATES.

Prince Henry of Prussia, attended by a large suite, came to the United States in February, 1902, to witness the launching of the yacht Meteor, which had been constructed for his brother, Emperor William of Germany, by a firm of American ship-builders. The visit was made the occasion of a demonstration of national good will toward his country and during his brief stay he was made the recipient of many honors from the government, states, municipalities, associations and individuals.

The prince arrived in New York Feb. 23 and sailed for home March 11. Dates of the principal events of his visit follow:

Received by the president, Feb. 24; attended the launching, 25; at merchants' and press banquets in New York, 26; McKinley memorial exercises and trip to Mount Vernon, 27; at Annapolis, 28; departure for southern and western trip, March 1; at Chattanooga and Lookout mountain, 2; in St. Louis and Chicago, 3; in Chicago and Milwaukee, 4; at Niagara falls, 5; in Boston, 6; at Albany and West Point, 7; in New York, 8 and 9; in Philadelphia, 10. Banquets, balls, receptions, drives and presentations of addresses were features of the programme at nearly every stopping place.

POLITICAL PARTY PLATFORMS OF 1902.

In nearly all the state conventions of the two leading political parties in 1902 the tariff and trust questions were brought to the front. Republicans generally treated them as distinct issues, but democrats made them one by insisting that the tariff fostered trusts. Broadly speaking, the policies most emphatically insisted upon by each party were these:

Republican—Preservation of the principle of protection; regulation of trusts and industrial combinations and enforcement of existing antitrust laws.

Democratic—Tariff for revenue only; abolition of all duties on articles or commodities handled by trusts or combinations; enforcement of existing antitrust laws and enactment of additional laws.

Incidentally such questions as reciprocity with Cuba, Canada and other countries, arbitration in labor disputes, government ownership of public utilities, direct election of United States senators by the people, ship subsidies, imperialism and militarism received some attention, but they were overshadowed to such an extent by the tariff-trust issue as to be of comparatively little importance in the campaign.

REPUBLICAN PLATFORMS.

The following extracts from a few of the republican state platforms exemplify the general position of the party on the subject of the tariff and the trusts:

MASSACHUSETTS—"The greatest national issue is the maintenance of prosperity. The integrity of the protective principle must be preserved. The principle is required to maintain the highest scale of American wages and the supremacy of the American workshop. * * * Nearly everything which has been achieved for the benefit of humanity, especially under free governments, has been achieved through co-operation and combination. We recognize the right and the necessity of such co-operation. Labor has the right to combine for its own defense and protection, to secure good wages, reasonable hours for work and the health and safety of the workmen. Capital has the right to combine to accomplish results too great for individual effort, to promote economy in administration and in manufacture and to entitle it to encounter successfully like combinations in foreign countries for the possession of foreign markets. These combinations of labor and capital, by whatever name they are called, are the natural results of modern economic development and are entitled to the due protection of the law so long as they are innocent and law-abiding. They must also obey the law and submit to legal restraint if they become pernicious, dangerous to the public safety or tyrannical, or if they undertake to interfere with individual liberty. No so-called trust must be permitted to use its power to crush out lawful competition or to defraud unwary investors by fictitious or fraudulent issues of stock not representing real value."

CONNECTICUT—"We believe, with Lincoln, Garfield, Blaine, McKinley and Roosevelt, in a protective tariff that wisely fosters American industries and safeguards American wages. We oppose a general revision of the tariff at this time as both inopportune and unnecessary. If, in any schedule,

import duties are found that have been notoriously perverted from their true purpose to the inordinate enrichment of corporations monopolistic in fact or in tendency we look to a republican congress to apply, in its wisdom, the needed corrective without impairing the principle of protection."

MICHIGAN—"We continue our abiding faith in the protective tariff and are opposed to all efforts to destroy it or emasculate it or weaken its beneficent operations."

INDIANA—"While we favor such modifications of the tariff schedules as from time to time are required by changing conditions, we insist that such changes shall be made in line with the fundamental principle of protection."

ILLINOIS—"We approve of the republican policy of protection under which our industries have developed, agriculture has been benefited and labor has been given steady employment at constantly increasing wages, and we approve of all organizations that will benefit the condition of labor and result in the common good of the toiling masses. We condemn all conspiracies and combinations to restrict business, to create monopolies, to limit production or to control prices, and favor such legislation as will effectually restrain and prevent all such abuses, protect and promote competition and secure the rights of producers, laborers and all who are engaged in industry and commerce, and we approve and commend the efforts of President Roosevelt to enforce laws against illegal combinations in restraint of trade and pledge him our hearty support in all his efforts to protect the people from oppressive combinations of capital."

COLORADO—"We believe these questions should be solved along lines of regulation against abuses and not by radical legislation destructive of business interests."

PENNSYLVANIA—"We reaffirm our unswerving loyalty to the republican principle of a protective tariff and deprecate any suggestion under existing circumstances of a general revision of the existing tariff law. Under its beneficent operation we are in the enjoyment of unparalleled prosperity. Capital and labor are both remuneratively employed, our home market has largely increased, we have secured our fair share of the markets of the world with the promise of still further conquests therein. Having reduced taxation within three years to the amount of \$115,000,000, we are still in receipt of ample revenues; having conducted an expensive war inaugurated four years ago, we have paid all of its costs and still find the national treasury to-day richer by \$33,000,000 than it was before the war began. We believe it to be the dictate of wisdom to let well enough alone and not to imperil business interests by any suggestion of present interference with revenue legislation."

"THE IOWA IDEA."

IOWA—"We stand by the historic policy of the republican party in giving protection to home industries and point for its ample vindication to the extraordinary rapidity with which our national resources have been developed and our industrial and financial independence secured. We favor

such changes in the tariff from time to time as become advisable through the progress of our industries and their changing relations to the commerce of the world. We indorse the policy of reciprocity as the natural complement of protection and urge its development as necessary to the realization of our highest commercial possibilities."

MINNESOTA—"We favor such modifications in our tariff schedules as are now or may from time to time be required by changing conditions to remove any burdens from our people and to hold and extend our trade among the nations."

OHIO—"We recognize the necessity of cooperation in order to meet new conditions in the industrial world and to compete successfully for the world's markets; but all combinations that stifle competition, control prices, limit production or unduly increase profits or values, and especially when they raise the prices of the necessities of life, are opposed to public policy and should be repressed with a strong hand."

ROOSEVELT INDORSED FOR 1904.

Reciprocity with Cuba, the conduct of the war and the civil government in the Philippines, the prosecution of illegal industrial combinations and other policies of the administration were indorsed by all the republican conventions except the one in California, which opposed reciprocity with Cuba. Theodore Roosevelt was specifically named by most of them as the party's candidate for the presidency in 1904.

DEMOCRATIC PLATFORMS.

The democratic state platforms, with the exception of two or three which ignored national issues, as was the case notably in Michigan and Pennsylvania, demanded a tariff for revenue only and the abolition of all duties on articles or commodities handled by trusts. Legislation against illegal combinations was demanded and the policy of the administration in the Philippines was generally condemned. The position of the democratic party on the tariff-trust question is shown by these extracts from typical platforms:

ILLINOIS—"Private monopolies destroy competition and control the price of material, labor and finished product, thereby robbing both producer and consumer; we therefore insist upon a rigid enforcement of the present antitrust laws and favor such further legislation, both federal and state, as may be necessary to prevent such combinations. We denounce the republican tariff as a prolific mother of trusts. We demand a thorough revision of the tariff and the abolition of special privileges, and, as the first, most obvious and most effective means of eliminating special privileges from our laws and of restoring to American citizenship the equality which is its birth-right, that every product of a tariff-protected, competition-destroying trust be placed on the free list."

NEW YORK—"Existing laws against trusts must be enforced, more stringent ones must be enacted, reasonable limitations and restrictions should be imposed upon the extent to which wealth shall be permitted to combine and virtually monopolize any branch of industry or the production of any article of merchandise, and the whole constitutional power of congress over the subject of taxation, interstate commerce, the

mails and all modes of interstate communication should be exercised by the enactment of comprehensive laws, and the vast legislative powers of the states should be invoked to the end that the people may have adequate relief from present intolerable trust conditions."

MASSACHUSETTS—"In the place of the republican policy of fostering and protecting great monopolies by legislation at the expense of the people, we demand protection for the people against the abuses and exactions of monopoly. We make no warfare upon any legitimate corporate business which is willing to sustain itself without governmental favors and to submit to reasonable governmental supervision and regulation, but the supremacy of the state over its corporate creatures must be asserted and maintained, and they must conduct their business with due regard to the vast public interests in their charge. *** The present tariff is protecting great trusts in making exorbitant profits upon the necessities of our people, while selling their products to foreign markets at much lower prices than the prices exacted here. We demand the repeal of all tariff duties upon articles whose production is controlled by trusts. This is the one simple, practical and immediate remedy which will at least limit the exactions of monopoly; it can be applied while further legislation is being formulated and discussed. The federal government can at least allow the people to purchase their coal and their meat, which have been rising toward prohibitive prices, without paying tribute to the coal trusts and the meat trusts."

INDIANA—"We denounce the republican party for its surrender to and alliance with the trusts, and we favor such legislation as will suppress and destroy all trusts or combinations that control the production and the price of commodities. We denounce the Dingley law as the breeder of trusts and demand that tariff duties shall be levied for the purpose of revenue only and limited by the needs of the government honestly and economically administered."

MINNESOTA—"We would revoke the tariff benefits the trusts enjoy; we would refuse the subsidy they seek, and we would enforce the laws against them, sparing none."

THE KANSAS CITY PLATFORM.

The democratic state conventions indorsing the Kansas City platform of 1900 with its free-silver plank included those of Arkansas, Colorado, Idaho, Montana, Nebraska, South Dakota, Utah, Washington and Ohio. The Nebraska convention declared: "We, the democrats of Nebraska, in convention assembled, reaffirm our faith in the principles of the party as enunciated in the last national platform as adopted at Kansas City and we point to the vindication which that platform has received from the events of the last two years."

The part of the Ohio democratic platform indorsing the Kansas City policy was as follows: "We hereby acknowledge and declare our continued allegiance to the democratic party of the nation and on national issues reaffirm and indorse the principles laid down in its last national platform adopted at Kansas City and which were fully and ably represented in the presidential campaign of 1900 by William Jennings Bryan. Regarding those principles as opposed to imperialism and colonialism, as opposed to government by injunction, as

opposed to trusts and trust-fostering tariffs, as opposed to financial monopoly and as opposed to all other legalized monopolies and privileges, we condemn every effort to repudiate or ignore them."

Among the conventions ignoring the Kansas City platform were those of Connecticut, Georgia, Iowa, Indiana, Illinois, Massachusetts, Minnesota, Michigan, New York, Pennsylvania, Texas and Wisconsin. In Iowa an attempt to reaffirm the Kansas City platform was defeated by a vote of 334 to 344 and in place of such reaffirmation this declaration was adopted: "We reaffirm the fundamental principles of democracy as promulgated by the great leaders from the foundation of our government to the present time."

THE COAL STRIKE.

References to the strike of the anthracite coal miners in Pennsylvania and West Virginia were made in some of the party platforms adopted late in the year. The most radical utterance was that of the democrats of New York at their convention in Saratoga Oct. 1. It was declared:

"We advocate the national ownership and operation of the anthracite coal mines by the exercise of the right of eminent domain, with just compensation to the owners. Ninety per cent of the anthracite coal deposits of the world being in the state of Pennsylvania, national ownership can but be in the interest of the whole people. Fuel, like water, being a public necessity, we advocate national ownership and operation of the mines as a solution of the problem which will relieve the country from the sufferings which follow differences between labor and capital in the anthracite mines. This course will insure peace in the mining regions and remove the cause for differences leading not only to suffering but oftentimes to bloodshed and insurrection. It will relieve the consumers of coal not only in this state but throughout the whole country; insure steady employment and ample compensation to labor; transfer children from the mines to the schools; insure, strengthen and preserve the stability of the business interests and popular institutions of our country. Whatever differences of opinion may exist over other propositions of public ownership, the propriety of that policy as applied to anthracite coal mines must be apparent to every citizen."

On the other hand, at the Massachusetts republican state convention, held Oct. 3, it was declared: "The conflict between the miners and the mine owners in the anthracite coal fields of Pennsylvania has para-

lyzed that industry and brought trouble, loss and distress in a constantly increasing measure upon the people of the United States. The question is not a political one and should not be made so to advance party purposes. It is a calamity common to us all, and the situation is too grave, the prospect of loss and suffering by all conditions of our people is too serious, to be passed over in silence by any representative body of American citizens. We most heartily approve the action of the president of the United States in the effort he is making to end this strike and give the people the coal they so greatly need."

OTHER POLITICAL EVENTS.

HENDERSON'S WITHDRAWAL.

In consequence of the adoption of the tariff revision plank in the Iowa state republican platform David B. Henderson, speaker of the house of representatives, declined to accept a renomination to congress by the republicans of his district (3d Iowa). In a letter addressed to the chairman of the notification committee and made public Sept. 16 he said he believed many of the people of the district and state thought he did not truly represent their views on the tariff question. "Believing this condition to exist," he wrote, "and knowing that I do not agree with many of my people that trusts, to which I am and have been opposed, can be cured of the people benefited by free trade, in whole or in part, I must decline to accept the nomination so generously and enthusiastically made."

NATIONAL LIBERAL PARTY.

The national liberal party was formed at Cincinnati Jan. 26, 1902. It is composed of freethinkers who desire the separation of church and state to the extent of prohibiting chaplains in the army and navy, in legislative bodies and in all public institutions, the taxation of church property and abandonment of sabbath observance.

UNITED STATES SENATORS.

Senators William B. Allison and Jonathan P. Dolliver, republicans, were re-elected in Iowa; John F. Dryden, republican, was elected to succeed the late W. J. Sewell in New Jersey, and Russell A. Alger, republican, was appointed to succeed James McMillan, deceased, in Michigan; James B. McCreary, democrat, was elected in Kentucky, and Arthur Pue Gorman, democrat, in Maryland; James P. Clarke, democrat, won in the primaries in Arkansas, and Albert J. Hopkins, republican, was indorsed for election in Illinois.

PRODUCTION OF CRUDE PETROLEUM IN UNITED STATES.

[From Engineering and Mining Journal.]

The total production of crude petroleum in the United States in 1901 was 69,389,194 barrels, being larger than that of any previous year. It was larger by 5,768,665 barrels, or 9 per cent, than the production of the year 1900. The increase in the production of 1900 over 1899 was 6,291,854 barrels, or 11 per cent, and the increase in 1899 over 1898 was 3 per cent, or an average gain of 7.7 per cent for the last three years.

The Appalachian field produced 48.45 per cent of the total output, the Lima-Indiana field 31.61 per cent, and all other fields 19.94 per cent, as compared, respectively, with

57.5 per cent, 34.34 per cent and 8.61 per cent in 1900. The new fields of California, Colorado, Kansas, Wyoming and Texas produced practically 20 per cent of the total production of 1901, a gain of 11.4 in percentage over 1900, with the probability that the southwest and west will have produced 35 per cent of the total output in 1902.

The average price paid for all the petroleum marketed in the United States during 1901 was 95.7 cents per barrel, as compared with \$1.194 in 1900, showing a decrease of 23.7 cents per barrel, or 20 per cent—the lowest price since 1898.

NOTED TRIALS OF 1902.

BURNS—Florence Burns was accused of the murder of Walter T. Brooks in the Glen Island hotel, New York city, Feb. 14, 1902. Her trial resulted in acquittal March 22, the presiding justice declaring that the evidence against her was insufficient.

MOLINEUX—Roland B. Molineux was charged with causing the death in New York city Dec. 28, 1898, of Katherine J. Adams by means of poison. His trial began Nov. 14, 1899, and lasted until Feb. 10, 1900, when a verdict of guilty was returned. Feb. 16 he was sentenced to death. An appeal was taken and argued in June, 1900. The case was taken under advisement and on the 15th of October, 1901, a new trial was granted by the Court of Appeals in Albany. The second hearing began Oct. 20, 1902, and resulted Nov. 11 in a verdict of not guilty.

MORRISON, JESSIE—Defendant was charged with the murder of Mrs. Olin Castle at Eldorado, Kas., in June, 1900, jealousy being the motive alleged. The first trial resulted in a disagreement and the second in a verdict of manslaughter. The case was appealed and the third trial began June 20, 1902, and resulted in another verdict of guilty June 28.

NEELY—C. F. W. Neely, E. G. Rathbone and W. H. Reeves were convicted March 24, 1902, in Havana, Cuba, of embezzling postoffice funds and stamps to the value of \$250,691. They were sentenced to ten years in prison each and to pay fines aggregating \$127,541. Neely, who was credited with being at the head of the conspiracy, had charge of the postal bureau. Reeves was chief of postal accounts and Rathbone was director-general of Cuban posts. The frauds were committed in 1899 and 1900. Reeves was pardoned April 22 in consideration of having turned state's evidence. Neely and Rathbone were released June 11 under a general amnesty to all American prisoners.

O'DONNELL, PATRICK H., ET AL.—Patrick H. O'Donnell, James T. Brady, John O'Donnell, William J. Gallagher, Cyrus S. Simon, Herbert Rothery and Hammond T. Lawrence were charged with bribing jurors in cases against the Union Traction company in Chicago. They were indicted April 26, 1902, and the trial began June 2. Seven hundred veniremen were called and examined before a jury was secured. The trial ended June 28 in a verdict of guilty. P. H. O'Donnell and Brady, who were law partners, were sentenced to pay a fine of \$2,000 each; Gallagher was sentenced to imprisonment in the penitentiary; John O'Donnell was fined \$500 and Lawrence and Rothery were each fined \$200. C. S. Simon, William Gallagher, Chris Miller, Oscar C. Voorhees and John Brown pleaded guilty July 19 and were fined from \$200 to \$2,000 each.

PATRICK—Albert T. Patrick was charged with the murder of William Marsh Rice in New York city Sept. 23, 1900, after having been made his residuary legatee and having obtained from him checks for \$250,000 the day before his death. The trial began Jan. 20, 1902, and closed March 23 with a verdict of guilty. Ninety-six witnesses testified and the cost of the trial was about \$100,000. Patrick was sentenced to die in electric chair May 5.

RICHARDSON—Mrs. Addie L. Richardson was accused of the murder of her millionaire husband, Frank W. Richardson, a merchant of Savannah, Mo., on Christmas eve, 1900. Her trial began at Plattsburg, Mo., Jan. 13, 1902, and ended Jan. 25 in her acquittal.

SULLIVAN—Alexander Sullivan, lawyer, was charged with conspiring to remove Bailiff Lynch, a confessed jury-briber, from the reach of prosecution. The trial began Nov. 20, 1901, and ended Dec 23 in a verdict of guilty, the punishment being fixed at a fine of \$2,000. Sentence was formally passed March 29, 1902.

WALLER—Maj. Lytleton W. T. Waller of the United States marine corps was charged with shooting natives of the island of Samar in the Philippines without trial, contrary to the rules of war, in December 1901, and January, 1902. The major was tried by court-martial March 17-April 13 and was acquitted by a vote of 11 to 2. It was urged in his defense that he was acting under the orders of Brig.-Gen. Smith and that at the time of the alleged offense he was suffering physically and mentally from severe privations undergone on an expedition into the interior of Samar.

WILCOX—Miss Nellie Cropsey, daughter of a well-to-do resident of Elizabeth City, N. C., disappeared from home on the night of Nov. 20, 1901. Thirty-seven days later her body was found in the river not far from her father's house. James Wilcox, a former lover, was arrested on the charge of having killed her. His trial began March 13, 1902, and ended in conviction on the 22d of the same month.

WILLIAMS—Capt. Edward Williams and Luke Wheeler were indicted with others Sept. 3, 1902, for conspiracy to defraud Cook county of taxes amounting to \$26,770.17 due on the Masonic Temple in Chicago. Their trial began Oct. 6 and Oct. 25 a verdict was returned finding them guilty. Wheeler's punishment was fixed at two years in the county jail and the payment of a fine of \$3,500. Williams was given a fine of \$1,500 and six months in jail. Wheeler had a trial for forgery Sept. 26-Oct. 4 in connection with tax-fixing, but the jury failed to agree.

THE DANISH WEST INDIES.

On the 24th of January, 1902, a treaty was signed at Washington by Secretary John Hay and Constantin Brun, the Danish minister, for the sale to the United States of the Danish islands of St. Thomas, St. John and St. Croix in the West Indies for the sum of \$5,000,000 in gold. The treaty was ratified by the senate of the United States Feb. 17 and by the lower house of the Danish parliament March 14,

but the folksting, or upper house, on the 23d of April voted to defer ratification until after the elections in September. The ministerial party was in favor of the treaty and was apparently sustained by the people, but when the matter came to a vote Oct. 22 ratification was refused by a tie vote of 32 to 32. Prior to this action the governments of both countries had extended the time for ratification to July, 1903.

THE PHILIPPINE ISLANDS.

The Philippine islands were ceded to the United States by Spain Dec. 10, 1898. Maj.-Gen. Merritt was the first military governor. He was succeeded in August, 1898, by Maj.-Gen. E. S. Otis, who in turn was followed May, 1900, by Maj.-Gen. Arthur MacArthur. The last named remained in office until July 4, 1901, when the military authority was transferred to Gen. A. R. Chaffee. By order of the president Gen. Chaffee was relieved of his duties as military governor July 4, 1902, and the office terminated. The Philippine commission was at the same time made the superior authority. Sept. 2 the islands were divided into three military departments, to be known as the department of Luzon, the department of Visayas and the department of Mindanao, commanded respectively by Gens. James F. Wade, T. J. Wint and Samuel S. Sumner.

OFFICIALS AND SALARIES—The government of the Philippine islands is at present in the hands of a commission appointed by the president of the United States, consisting of William H. Taft of Ohio, Prof. Dean C. Worcester of Michigan, Luke E. Wright of Tennessee, Henry C. Ide of Vermont and Prof. Bernard Moses of California. They have subdivided their duties as follows:

Governor—William H. Taft.
Vice-Governor and Secretary of Commerce and Police—Luke E. Wright.

Secretary Interior Department—D. C. Worcester.

Secretary Justice and Finance—H. C. Ide.
Secretary Public Instruction—B. Moses.
Executive Secretary—Arthur W. Ferguson.
Auditor—Abraham L. Lawshe.
Treasurer—Frank A. Branagan.
Superintendent of Education—Fred W. Atkinson.

Director-General of Posts—C. M. Cotterman.

Attorney-General—L. R. Wildfey.
Solicitor-General—Gregorio Araneta.
Collector of Customs—W. M. Shuster.
Chief Justice Supreme Court—Cayetano Arellano.

Secretary to Commission—Daniel R. Williams.

Governor Taft receives \$20,000 a year (\$15,000 as governor) and the other commissioners receive \$15,500 each (\$10,500 being for their services as heads of departments). The salaries of other leading officials are: Secretary to the commission, \$3,500; secretary to the governor, \$7,500; auditor, \$6,000; collector of customs, \$6,000; attorney-general, \$5,500; solicitor-general, \$4,500; chief justice Supreme court, \$7,500; associate justices, \$7,000; superintendent of public education, \$6,000; director-general of posts, \$6,000; treasurer, \$6,000.

AREA AND POPULATION—The total area of the Philippine archipelago is estimated at about 115,300 square miles and the population at between 8,000,000 and 12,000,000. No accurate surveys have been made of the 2,000 islands in the group and no census has been taken since 1887, so that the figures are merely approximate. In May, 1901, a sanitary census of Manila, taken under the supervision of Lieut. Harry L. Gilchrist, showed that the total population was 244,732, of which number 181,361 were Filipinos, 51,567 Chinese, 8,562 Americans, 2,382 Spaniards and 960 of other nationalities. American soldiers were not included in the count.

PRODUCTS AND CLIMATE—The chief products are hemp, sugar, coffee, tobacco leaf, copra, cigars and indigo. Between 600,000 and 700,000 bales of hemp are exported annually. From 1895 to 1899 the shipments of hemp to the United States have been: 1895, 273,918 bales; 1896, 290,327; 1897, 417,963; 1898, 333,124; 1899, 265,828.

The climate of the Philippine islands is considered excellent for the tropics. The mean temperature in Manila ranges from 77 in January to 83 in May. June, July, August and September comprise the rainy months; March, April and May the hot and dry and October, November, December, January and February the temperate and dry.

EDUCATION—In all the peaceful provinces rapid progress has been made in providing schools and teachers. Nearly 500 men and women were brought from the United States in 1901 under three-year contracts to engage in the work of educating the natives and their children. It was found impracticable to make any other language than English the medium of imparting knowledge, as the home dialects were too numerous and Spanish was not understood by many.

END OF THE WAR.

Though the office of military governor of the Philippines was not terminated until July 4, 1902, the war is generally regarded as having come to an end on the 30th of April preceding. After that date no engagements took place in which civilized Filipinos opposed the forces of the United States. The following statistics of the war were prepared in the adjutant-general's office in Washington: Number of engagements between Feb. 4, 1899, and April 30, 1902, 2,561; troops transported to the Philippines, 4,135 officers and 128,803 men; average strength of the army, 40,000; killed or died of wounds, 69 officers and 936 enlisted men; deaths from disease, 47 officers and 2,535 enlisted men; deaths from accidents, 6 officers and 125 enlisted men; drowned, 6 officers and 257 enlisted men; suicide, 10 officers and 72 enlisted men; murdered, 1 officer and 91 enlisted men; total deaths, 139 officers and 4,016 enlisted men; wounded, 190 officers and 2,707 enlisted men.

In reply to a resolution of the senate Secretary of War Root gave the total cost of the war as \$170,326,586, divided by fiscal years as follows: 1898, \$2,686,850; 1899, \$26,230,673; 1900, \$50,869,753; 1901, \$55,567,022; 1902 (to April 30), \$34,499,022; outstanding obligations, \$473,073.

LEGISLATION BY CONGRESS.

NEW TARIFF LAW—Two laws of much importance to the Philippines were passed at the first session of the 57th congress. The first bill taken up was one providing a temporary tariff for the islands. This was passed by the house Dec. 18, 1901, and by the senate Feb. 24, 1902. It provides that articles imported into the Philippine archipelago from the United States shall be required to pay the duties levied against them by the Philippine commission and paid on like articles imported into the archipelago from foreign countries and that articles imported into the United States from the Philippines shall pay a duty of 75 per cent of the rates fixed by the Dingley law, less any export taxes paid on the ar-

ticles sent from the Philippine archipelago, as required by the Philippine commission. All articles now imported free into the United States shall be hereafter exempt from export duties imposed in the Philippines. The commerce passing between the United States and the Philippines is exempted from the operation of the navigation laws of the United States until July 1, 1904. The duties and taxes collected in pursuance of this act shall be paid into the treasury of the Philippine islands and used for their benefit. All articles manufactured in bonded manufacturing warehouses of imported materials or of materials subject to internal-revenue tax when shipped from the United States to the Philippines shall be exempt from the internal-revenue tax.

CIVIL GOVERNMENT—The second and more important measure was that providing for civil government in the Philippine islands. What was known as the Lodge bill was passed by the senate June 3 after a long and at times acrimonious debate by a vote of 48 to 30. The house passed a substitute bill June 26 by a vote of 147 to 97, all the negative votes being democratic except that of Mr. McCall of Massachusetts. As agreed upon in conference and finally passed by both houses the law provides that the islands shall continue to be governed by the Philippine commission in accordance with the instructions of the president given April 7, 1900, the executive order dated June 21, 1901, and the requirements of this act. All laws hereafter passed by the commission shall have an enacting clause reading "By authority of the United States be it enacted by the Philippine commission." Future appointments of civil governor, vice-governor, members of the commission and heads of executive departments shall be made by the president by and with the consent of the senate. Section 2 relates to the tariff, confirming previous orders of the executive, except in so far as they may conflict with the provisions of the tariff act outlined above. Section 3 places the regulation and control of commercial intercourse with and in the islands in the hands of the president until otherwise provided by congress. The fourth section makes all the inhabitants of the islands, except such as shall have elected to preserve their allegiance to Spain, citizens of the Philippine islands and as such entitled to the protection of the United States.

Section 5 contains provisions corresponding to the "bill of rights" incorporated in the amendments to the constitution of the United States, except that trial by jury is not included. The privileges of the writ of habeas corpus are not to be suspended except in the case of rebellion or invasion, when the president or the governor, with the approval of the commission, may suspend them as long as may be necessary. Neither slavery nor involuntary servitude, except as punishment for crime, shall exist in the islands. No law shall be passed abridging the freedom of speech or of the press or the right of the people peaceably to assemble and petition the government for redress or grievances.

Section 6 provides that when a condition of general and complete peace shall have been established in the Philippines the president shall order the commission to take a census of the islands.

Section 7 provides that two years after the completion and publication of the census, in case such conditions of general and

complete peace, with recognition of the authority of the United States, shall have continued in that part of the islands not inhabited by Moros or other nonchristian tribes, the president shall direct the commission to call a general election for the choice of delegates to a popular assembly of the people, which shall be known as the Philippine assembly. After this body shall have convened and organized all the legislative power heretofore conferred on the Philippine commission shall be vested in a legislature consisting of two houses—the Philippine commission and the Philippine assembly. The assembly shall consist of not less than fifty nor more than 100 members, to be apportioned by the commission among the provinces as nearly as practicable according to population. Members of the assembly are to hold office two years. They must owe allegiance to the United States and must be not under 25 years of age. The remainder of the section relates to the sessions of the legislature, which are to be annual and not to continue more than ninety days, and to details of procedure.

The eighth section provides for the election by the legislature of two resident commissioners to the United States, who shall serve two years and be paid by the United States at the rate of \$5,000 each a year, with \$2,000 for expenses. They must be electors of the islands and not under 30 years of age.

Section 9 confirms the powers and jurisdiction of the Supreme court and courts of first instance of the Philippines as heretofore established by the commission. The chief justice and the associate justices of the Supreme court are hereafter to be appointed by the president. Section 10 cites the cases in which the Supreme court of the United States may review, revise, reverse, modify or affirm the findings of the Philippine Supreme court.

Under the eleventh section the government of the Philippines is authorized to improve the rivers and harbors and to construct and maintain wharves, lighthouses, bonded warehouses and signal stations. Section 12 provides that all the property and rights of the United States in the islands, except such land or other property as may be designated by the president for military and other reservations of the United States, shall be turned over to the government of the islands to be administered for the benefit of the inhabitants thereof. In section 13 it is provided that the Philippine government shall classify the public lands of the islands according to agricultural character and productiveness and make rules for their sale or lease. Timber and mineral lands are excepted and the rules and regulations are not to go into effect until approved by the president and congress. A single homestead is not to exceed sixteen hectares in extent. (A hectare equals 2.47 acres.) Section 14 empowers the Philippine government to establish rules and regulations by which persons holding lands without having secured legal title thereto, though having fulfilled all or some of the conditions required by the Spanish law, may perfect their titles. The Philippine commission is authorized to issue patents without compensation to any native of the islands conveying title to any tract of public land not more than sixteen hectares in extent which was public land and had been actually occupied by him or his ancestors prior to Aug. 13, 1898.

Section 15 authorizes the Philippine government to sell to actual occupants, settlers and citizens of the islands public lands, not timber or mineral, in tracts not exceeding sixteen hectares to each person and to corporations in tracts not exceeding 1,024 hectares to any one association. Sales are to be conditioned upon actual occupancy and improvement of the lands for five years.

Section 16 prescribes that in the sale of the public domain preference shall be given to actual occupants and settlers. Section 17 orders that all moneys received from the sale of public lands and from government licenses to cut timber shall be covered into the insular treasury and be used only for insular purposes. Section 18 continues in force the forest laws and regulations established by the commission, with the proviso that the government of the islands shall have the power to issue licenses to cut timber on the reserved and unreserved public lands and to lease land to any holder of such license sufficient for a mill site, not to exceed four hectares in extent. In section 19 beneficial use is made the basis, limit and measure of all rights to water in the islands and the Philippine government is authorized to make rules and regulations for the use of water.

Sections 20 to 62 inclusive relate to the mineral lands of the islands. It is provided that they shall be free and open to exploration, occupation and purchase by citizens of the United States and of the Philippine islands, and rules for making locations, obtaining patents, etc., are given at length.

Sections 63, 64 and 65 authorize the Philippine government to buy the lands of religious orders and others and issue bonds for the purchase price. This refers particularly to the large tracts of land held by the friars. This property when acquired by the government becomes part of the public domain and is subject to sale or lease, actual occupants or settlers having the preference among purchasers.

Sections 66 to 73 inclusive permit municipalities, with the consent of the government of the islands, the president and the congress of the United States, to issue bonds for the purpose of providing funds for all kinds of municipal betterments.

Section 74 gives the government of the islands authority to grant franchises for the construction of works of public utility and service and section 75 prohibits corporations from engaging in the real-estate business and restricts them, if engaged in agriculture, to the ownership of 1,024 hectares of land.

Sections 76 to 83 inclusive authorize the Philippine government to establish a mint in Manila and issue subsidiary and minor coins of silver and alloy. Section 84 relates to the entry and clearance of vessels, the rights of seamen and quarantine regulations. Section 85 makes the treasury of the Philippine islands and such banking associations as may be designated by the secretary of war and secretary of the treasury of the United States depositories of public moneys of the United States. The 86th section reserves to congress the power to annul all laws passed by the government of the Philippine islands and the 87th section continues the bureau of insular affairs of the war department until otherwise provided. The 88th and last section repeals all acts inconsistent with this law.

EVENTS OF THE YEAR.

Considerable progress was made in the course of the year toward settling the troublesome question relating to the religious orders. Gov. Taft visited Rome in June and July and had a number of conferences with the pope. An agreement was reached that the lands of the friars should be purchased and that the orders obnoxious to the natives should leave the islands. All details were left for future adjustment in the Philippines. Archbishop Guidi was appointed apostolic delegate to the islands. Other events were:

Feb. 22—Gen. Lucban captured by Lieut. Stribler.

March 25—Thirty deaths and forty cases of Asiatic cholera reported.

April 16—Gen. Malvar surrenders to Gen. Bell.

April 21—Troops under Col. F. D. Baldwin have engagement with Moros on island of Mindanao; seven Moros killed.

May 3—Moro fort at Bayan, Mindanao, taken by Col. Baldwin with 25th battery and part of 27th infantry; eight American soldiers killed and forty-one wounded; Moros lose about 200.

May 5—Captured Moros attempt to escape from guard; thirty-four of the prisoners killed and nine wounded.

May 25—Gen. Chaffee disapproves of the findings in the Waller and Day cases and censures the officers. (They were tried by court-martial for executing natives of the island of Samar without trial and were exonerated.)

June 21—Cholera spreading rapidly in Manila and the provinces. Total cases to date: Manila, 1,530 cases and 1,236 deaths; provinces, 7,369 cases and 5,440 deaths.

July 4—Political prisoners liberated under amnesty proclamation of the president of the United States. Gen. Chaffee relieved

of his duties as military governor. Civil government established except in Jolo, parts of Mindanao and southern Paragua.

July 16—President orders the retirement of Brig.-Gen. J. H. Smith for his "kill and burn" order.

ISLAND OF PORTO RICO.

Porto Rico, according to the decision of the United States Supreme court in the insular cases May 27, 1901, is a territory appurtenant and belonging to the United States, but not a part of the United States within the revenue clause of the constitution. The island was ceded to the United States by Spain Dec. 10, 1898, and was under military rule until the Foraker law went into effect May 1, 1900. (For the provisions of that law see The Daily News Almanac for 1901.) In accordance with the third section of that act, the legislative assembly of Porto Rico having put into operation a system of local taxation to meet the necessities of government, President McKinley on the 25th of July—the anniversary of the landing of American troops on the island in 1898—proclaimed free trade between the United States and Porto Rico.

GOVERNMENT—Civil government, under the provisions of the Foraker act, was established May 1, 1900. The upper house consists of eleven members, six of whom are "cabinet" officers appointed by the president; the lower house is made up of thirty-five delegates elected by the people every two years. The governor, who is appointed by the president, has practically the same duties as the governor of any other territory of the United States. The present officers are: Governor, William H. Hunt; secretary, Charles Hartzell; attorney-general, James S. Harlan; commissioner of education, Samuel M. Lindsay.

AREA AND POPULATION—The area of Porto Rico is about 3,600 square miles, and the population, as shown by the military census of 1899, is 953,243. Of these 941,751 are natives. The whites number 589,426 and the colored 363,817. The colored are subdivided into 304,352 mestizos, 59,390 negroes and 75 Chinese. By departments the population is: Aguadilla, 99,645; Arecibo, 162,308; Bayamon, 147,681; Guayama, 111,986; Humacao, 100,866; Mayaguez, 127,566; Ponce, 203,191. The cities having more than 5,000 inhabitants are: San Juan, 32,048; Ponce, 27,952; Mayaguez, 15,187; Arecibo, 8,008; Aguadilla, 6,425; Yauco, 6,108; Caguas, 5,450; Guayama, 5,334.

EDUCATION—In June, 1902, it was estimated that there were 300,000 children of school age on the island, but of these only 43,000 could be accommodated in the public schools. There were 1,000 teachers, of whom 120 were Americans. Nine hundred schools were open during the year. Textbooks, slates and stationery are furnished free. About 72 per cent of the population can neither read nor write, but illiteracy is chiefly confined to the colored races.

COMMERCE—For the year ended June 30, 1902, the total exports from Porto Rico to

foreign countries and the United States amounted to \$12,433,721, while the imports from all sources amounted to \$13,046,401. Of the exports the United States took merchandise valued at \$8,297,422; Spain, \$573,193; Cuba, \$619,395; France, \$1,479,795; Germany, \$324,691; Austria-Hungary, \$342,071. Of the imports \$10,719,444 came from the United States, \$869,479 from Spain, \$360,644 from the united kingdom, \$173,348 from France and \$202,040 from Germany.

GOVERNMENT—President, Tomas Estrada Palma.

Vice-President—Luis Estevez Romero.

Secretary of Government—Diego Tamayo.

Secretary of Finance—Garcia Montes.

Secretary of State and Justice—Carlos Zaldo.

Secretary of Public Instruction—Eduardo Yero.

Secretary of Public Works—Manuel Diaz.

Secretary of Agriculture—

Chief Justice of the Supreme Court—Cruz Perez.

President of the Senate—Domingo M. Capote.

Speaker of the House of Representatives—Pelayo Garcia.

Under the constitution as adopted the legislative power is exercised by two elective bodies—the house of representatives and the senate, conjointly called congress. The senate is composed of four senators from each of the six provinces, elected for eight years by the provincial councilmen and by a double number of electors constituting together an electoral board. Half of the electors must be persons who pay the highest amount of taxes. One-half of the senators are to be elected every four years. To become a senator it is necessary to be a native Cuban in the full possession of all civil and political rights and to have attained the age of 35 years.

The house of representatives is composed of one representative for each 25,000 inhabitants or fraction thereof over 12,500, elected for four years by direct vote. One-half of the members of the house are to be elected every two years. To be a representative it is necessary to be a native or naturalized Cuban who has lived eight years in the republic, to be in possession of all civil and political rights and to have attained the age of 25 years. The salary of members of congress is \$3,600 a year. Two sessions of congress are to be held each year, the first beginning on the first Monday in April and the second on the first Monday in November.

The president of the republic must be a native or naturalized Cuban citizen in the full possession of all civil and political rights and have attained the age of 40 years. He is elected by presidential electors, his term of office is four years and he cannot serve more than three consecutive terms. The vice-president must have the same qualifications as the president and his term of office is the same. He presides over the senate, but votes only in case of a tie. The president's salary is \$25,000 a year.

Members of the Supreme court must be

native Cubans and have attained the age of 35 years. Each province has one governor and one provincial council elected by direct vote of the people. Each council is composed of not less than eight nor more than twenty members. The municipal districts are governed by municipal councils elected by direct vote and each district has an alcalde, also elected by direct vote of the people. All male Cubans 25 years of age or over have the right of suffrage.

ORGANIZATION OF THE REPUBLIC—The organization of the republic of Cuba, begun in 1900, was practically completed on the 20th of May, 1902, when the military occupation of the island by the United States came to an end and Gen. Tomas Estrada Palma was inaugurated as the first president. Following is the chronological order of the chief events in the formation of the new state: Sept. 15, 1900—Delegates to constitutional convention elected pursuant to order of the military governor.

Nov. 5, 1900—Constitutional convention begins its session in Havana.

Feb. 21, 1901—Constitution is signed by members of the convention.

June 12, 1901—Platt amendment defining future relations of the United States and Cuba accepted by the convention.

Oct. 31, 1901—Convention dissolved.

Dec. 31, 1901—First general election held; electors favorable to Palma and Romero chosen.

Feb. 24, 1902—Presidential electors meet in Havana and cast their votes for Palma and Romero as president and vice-president respectively.

May 5, 1902—First session of the first Cuban congress begins.

May 15, 1902—House and senate in joint session formally declare Palma elected president and Romero vice-president.

May 20, 1902—President Palma inaugurated. Gen. Wood, military governor, sails for the United States. Flag of the United States hoisted on the capitol.

AREA AND POPULATION—The total area of Cuba is 35,994 square miles. The population in 1899, when the last census was taken, was 1,572,797, distributed among the six provinces as follows:

THE GENERAL CONVENTION.

The general convention of the protestant episcopal church takes place once in three years. It consists of the house of bishops, which includes the diocesan and missionary bishops, and the house of deputies, made up of four clergymen and four laymen from each diocese. It legislates for the church in the United States. Changes in the constitution or in the Book of Common Prayer must be adopted at one convention, referred to the dioceses and then ratified by a second convention. The next convention will be held in Boston in October, 1904.

Officers—House of Bishops: Presiding bishop, Thomas M. Clark, bishop of Rhode Island; chairman, Thomas U. Dudley, bishop of Kentucky; secretary, Rev. Samuel Hart. House of Deputies: President, Rev. John S. Lindsay; secretary, Rev. Charles L. Hutchins, Concord, Mass.

METHODIST EPISCOPAL CHURCH CONSTITUTION.

The new constitution of the methodist church was ratified by the conferences in the fall of 1901 by a vote of 8,241 to 2,525. It differs from the old constitution in three important particulars: Women are accorded the right to sit as delegates in the general conference; electoral meetings of laymen are permitted to vote on constitutional questions, and changes in the constitution may now be made by a two-thirds instead of a three-fourths vote. The constitution was formally proclaimed by the bishops at Chattanooga, Tenn., May 10, 1902.

PRESBYTERIAN CREED REVISION.

The general assembly of the presbyterian church was held in New York city, beginning May 15, with Dr. Henry Van Dyke as moderator. The report of the committee appointed by the assembly of 1901 to prepare a brief statement of the reformed faith was adopted May 22 with only two dissenting votes. With reference to infant damnation it is declared that chapter 10, section 3, of the confession of faith is not to be regarded as teaching that any who die in infancy are lost, and it is added: "We believe that all dying in infancy are included in the election of grace and are regenerated and saved by Christ through the Spirit, Who works when and where and how He pleases." Concerning election it is held that the divine decree hinders no man from accepting the offer of salvation and that no man is condemned except on the ground of his sin. The statement as to Antichrist is amended by omitting mention of the pope.

President, Rev. Samuel S. Seward, New York; secretaries, C. A. E. Spamer, Maryland, and Rev. Wm. H. Alder, Pennsylvania; treasurer, James R. Carter, Massachusetts.

Young People's Society of Christian Endeavor—President, Francis E. Clark, 600 Tremont Temple, Boston; treasurer, William Shaw, Boston; auditor, F. H. Kidder, Boston. The office of secretary is vacant, John W. Baer, who filled it for twelve years, having resigned in July, 1902, to become assistant secretary of the presbyterian board of home missions. The membership was reported at the biennial convention in 1901 to be about 4,000,000. Next convention to be held in Denver, Col., in 1903.

*Innocent party only. †Subsequent to marriage. ‡Incurable, after marriage. §Absence of ten years. ¶After divorce.

NOTE—Consanguinity and infidelity are causes for divorce in all the states.

MARRIAGE LAWS.

Marriage may be contracted without the consent of parents by males who are 21 years of age or more. This is the rule in about all the states having laws on the subject. In Arizona the age is 18. For females the age is 21 in Connecticut, Florida, Illinois, Kentucky, Louisiana, Ohio, Pennsylvania, Rhode Island, South Dakota, Virginia, West Virginia and Wyoming; 16 is the age in Arizona, Maryland and Nebraska and 18 in the other states. Marriages contracted before the age of consent are illegal in nearly all the states.

Marriage licenses are required in all the

states and territories with the exception of New Mexico, New Jersey, New York, North Dakota, Oklahoma and South Carolina.

Marriages between whites and negroes are prohibited by law in Alabama, Arizona, Arkansas, California, Colorado, Delaware, District of Columbia, Florida, Georgia, Idaho, Indiana, Kentucky, Maryland, Mississippi, Missouri, Nebraska, Nevada, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia and West Virginia. Michigan specifically declares such marriages valid.

Marriages between first cousins are pro-

hibited in Arizona, Arkansas, Illinois, Indiana, Kansas, Louisiana, Missouri, Montana, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota and Wyoming. Step-

relatives are not permitted to intermarry except in California, Colorado, Florida, Georgia, Idaho, Minnesota, New Mexico, New York, North Carolina, Oregon, Utah and Wisconsin.

CORONATION OF EDWARD VII.

The date originally set for the coronation of Edward VII. and Queen Alexandra of Great Britain was June 25, 1902, but owing to the sudden and critical illness of the king the ceremony did not take place until Aug. 9. For nearly a year preparations had been made to make the occasion one of the most notable in the history of the nation. Troops had been brought from all parts of Great Britain to take part in the procession through the streets of London and representatives from the leading powers had arrived and been received as guests of honor. The United States had sent Whitelaw Reid, Gen. James H. Wilson and Rear-Admiral John C. Watson.

On the 24th of June everything was in readiness, when it was announced that the king was suffering from perityphlitis, a disease akin to appendicitis, that a serious surgical operation had been performed and that the coronation was indefinitely postponed. Some alarm had been caused about ten days previously by reports of the king's illness, which began with a chill while he was at Aldershot, but it was generally thought by the public that the trouble was of a temporary nature and that no postponement would be necessary. The news that he was in imminent danger of death consequently caused sorrow throughout Great Britain and brought expressions of sympathy from all parts of the world.

The king was attended by Drs. Joseph Lister, Henry Francis Laking, Thomas Smith, Frederick Treves and Thomas Barlow, all eminent surgeons. The operation and subsequent treatment proved successful, and after some weeks, during which the chances of life and death seemed about even, the royal patient recovered sufficiently to permit of his removal to the royal yacht at Cowes. Here he rapidly regained his strength and on Saturday, the 9th of August, he was crowned in Westminster abbey in the presence of a brilliant assemblage of the peers and peeresses of the realm and many other distinguished personages. The archbishop of Canterbury administered the oath to the king, anointed and crowned him. Queen Alexandra was crowned by the archbishop of York. Some parts of the ceremony as originally planned had to be abbreviated or omitted and the special representatives of the powers were absent, but the changes in the programme did not detract from the splendor and solemnity of the occasion. The procession through the streets was witnessed by great throngs and the king and queen were received with loud acclamations along the whole route. Edward conferred honors upon many distinguished men and further signaled the day by presenting Osborne House to the nation to be used as a convalescent home for officers of the army and navy.

GREAT FIRE AT PATERSON, N. J.

Twenty-six blocks in the business section of Paterson, N. J., were destroyed by a fire which began early on the morning of Feb. 9. Many of the finest stores and office buildings in the city, five churches and

about 500 residences were burned. Two deaths were caused and sixty-three persons were injured, while the property loss amounted to \$8,000,000. The insurance was between \$4,000,000 and \$5,000,000.

WEALTHIEST MEN AND WOMEN IN THE WORLD.

For obvious reasons it is not possible to give an accurate enumeration of the richest men and women in various countries of the world. Even in nations having income-tax laws the wealth of individuals is only approximately known. The following list is, therefore, not to be regarded as either complete or absolutely correct as to the amounts given, though an attempt has been made to avoid the usual exaggerations in estimating great fortunes. Correspondents of The Chicago Daily News in this and other countries have supplied the data:

Austria—Baron Albert Rothschild, banker and capitalist, \$150,000,000.
 Prince Johann Lichtenstein, landed estates, \$125,000,000.
 Prince Schwarzenberg, landed estates, \$125,000,000.
 Belgium—Duke of Arenberg, land owner, \$20,000,000.
 Count of Flanders, lands, \$15,000,000.
 Montefiore Levi, manufacturer, \$12,000,000.
 Canada—Lord Strathcona (Sir Donald Smith), \$50,000,000.
 Sir William C. Macdonald, \$25,000,000.
 Lord Mountstephen, \$15,000,000.
 James Ross, \$12,000,000.
 William McKenzie, \$12,000,000.
 R. G. Reid, \$10,000,000.
 R. B. Angus, \$8,000,000.
 Denmark—J. Jacobsen, Copenhagen brewer, \$10,000,000.
 Count C. Ahlefeldt, \$10,000,000.

STRIKE OF THE ANTHRACITE COAL MINERS.

Strike began May 12, 1902.

Strike ended Oct. 21, 1902.

Employees involved, about 147,500.

Estimated total loss, \$26,210,000.

The most important strike of 1902 was that of the anthracite coal miners of Pennsylvania and West Virginia. It began May 12, when President John Mitchell of the United Mine Workers of America issued an order for a temporary cessation of work. This order was obeyed by about 147,500 men. Four days later at a convention of miners at Hazleton, Pa., it was decided by a vote of 461 $\frac{1}{4}$ to 349 $\frac{3}{4}$ to continue the strike. June 2 most of the engineers, pumpmen and firemen went out. Efforts to settle the strike by arbitration failed.

The cause of the strike was the refusal of the presidents and directors of the coal-operating railroads to comply with these demands of the miners:

1. That there should be an increase of 20 per cent to miners paid by the ton—that is, for men performing contract work. These men included about 40 per cent of all the miners.

2. That there should be a reduction of 20 per cent in the time of per diem employees. This demand, if granted, would result in reducing the day to eight hours (20 per cent), as prior to the strike the mines were operated about 200 days in the year, ten hours per day, and under the new plan the mines would be operated 240 days at about the same pay. This would be equivalent to 20 per cent increase in the earnings of the men, no increase in the rates of per diem employees being demanded.

3. That 2,240 pounds should constitute the ton on which payment is based for all coal mined where the miners are paid by weight. This would apply in any district where weighing coal would be practicable, and to those miners who were paid by the quantity and not to those paid by the day.

The mine operators maintained that the wages paid were fair and just, that they could not be increased without raising the price of anthracite coal, thus driving the public to the use of bituminous coal and leading to a restricted market, curtailing production and depriving the anthracite coal miners of regular employment; that they would not permit miners, and especially outside miners, to interfere unreasonably with the discipline and the ordinary management of the business, and, finally, that the various conditions at the different mines in the anthracite field made a uniform scale impossible.

In June President Roosevelt instructed Carroll D. Wright, the commissioner of labor, to investigate the strike and make a report. The latter did so and in the latter part of the same month reported the causes of the controversy to be substantially as given above. In July rioting of a more or less serious character took place in the

mining regions of Pennsylvania and state troops under Gen. Gobin were sent to Shenandoah and other places.

As the strike was prolonged throughout the summer and early fall without a settlement the country was brought face to face with the prospect of a serious fuel famine. In some places \$25 a ton was asked for hard coal and but little could be had even at that price. The press, the pulpit, mayors of cities and political conventions took the matter up and proposed various plans for ending the strike, but nothing was accomplished until President Roosevelt on the 1st of October asked John Mitchell and the representatives of the coal-operating railroads to meet him for a conference at the executive office in Washington. This conference, the first of the kind ever requested by the president of the United States, took place Friday, Oct. 3. The mine operators were represented by George F. Baer, president of the Reading railway system; W. H. Truesdale, president of the Delaware, Lackawanna & Western railroad; E. B. Thomas, chairman of the board, Erie railroad; Thomas P. Fowler, president New York, Ontario & Western road; R. M. Olyphant, president of the Delaware & Hudson road, and John Markle of New York. President Mitchell, representing the strikers, agreed to accept arbitration by a committee to be named by President Roosevelt, but the proposition was rejected by the operators, who declined to arbitrate except with the miners individually and demanded that troops be furnished to permit them to reopen the mines. The conference thus ended in failure.

On the 6th of October the entire national guard of Pennsylvania was ordered to the coal fields. Oct. 7 President Roosevelt asked the coal miners to resume work on promise of investigation and congressional action. The request was declined. Oct. 9 at a conference of mayors in Detroit resolutions were passed urging the state of Pennsylvania to seize the coal mines and coal roads by condemnation and operate them for the benefit of the public and asking that the attorney-general bring proceedings against the coal roads for violating the Sherman antitrust act. In the meantime the president continued his efforts to bring about a settlement, and finally after repeated conferences, in which Mr. Mitchell, Secretary Root, Commissioner Carroll D. Wright, Commissioner Sargent and Messrs. George W. Perkins and Robert S. Bacon of the firm of J. P. Morgan & Co. of New York took part, the parties to the controversy agreed to accept as arbitrators these men: Gen. John M. Wilson, Bishop John L. Spaulding, Judge George Grav, Edgar E. Clark, Edward Wheeler Parker, Thomas H. Watkins and Carroll D. Wright. This agreement was reached early on the morning of Oct. 14.

President Mitchell called a delegate convention of the miners at Wilkesbarre, Pa., and at this convention it was unanimously voted, Oct. 21, to accept arbitration and to resume work in the mines Oct. 23.

Various estimates of the total loss caused by this strike were made, but most of them were obviously much too high, some making it nearly \$200,000,000. The following figures, though necessarily based on conjecture, like the others, probably come nearer the truth:

Loss to railroad companies in freight	\$14,000,000
Loss to anthracite operators from unusual sales of bituminous coal	6,000,000
Cost of coal and iron police force	1,000,000
Loss to miners in wages	4,416,000
Damage to mines	800,000
Total	\$26,210,000

LABOR TROUBLES IN CHICAGO.

Many strikes took place in Chicago in the course of the year, but most of them were settled in short order by compromise or arbitration. The most serious were those of the stockyards teamsters and the railroad freight handlers. The teamsters to the number of 526 struck early in May for increased pay and the exclusive employment of union men. The attempt of the packers to deliver meat to the downtown markets led to frequent disorders, culminating June 4 in a series of riots in the central part of the city. From seventy-five to 100 persons were hurt by flying missiles and numerous arrests were made by the police. The strike was settled by arbitration June 5, the packers agreeing to advance wages and the men to recede from their demand for recognition of their union. The drivers of the State street department stores struck June 3, but the trouble was quickly settled by arbitration.

The strike of the members of the Interior

Freight Handlers and Warehousemen's union in Chicago, numbering about 9,000, began July 7. The cause was the refusal of the railroads to pay higher wages. The strike terminated July 16, when a slight increase in wages was granted.

In the latter part of April the firemen and deck hands of the Great Lakes Towing company struck for an advance of wages from \$52.50 to \$60 per month. The trouble was settled Sept. 3 by compromise. All the great lake ports were affected.

OTHER STRIKES IN 1902.

Boston—Six thousand teamsters struck on March 10 against working with nonunion men. They returned to work three days later without having succeeded in their object.

New Orleans—A street-car strike lasting two weeks was ended Oct. 12 by compromise. In a riot Oct. 8 four persons were shot, one fatally.

Norfolk, Va.—Rioting caused by a street-car strike took place March 4 and the city was temporarily placed under martial law.

Paterson, N. J.—An unsuccessful strike of operatives in the silk mills led to serious disorders June 18. Some of the mills were partially wrecked by the strike and a dozen or more persons were shot in fights with the police.

Providence, R. I.—The conductors and motormen of the United Traction company struck in May because their pay was reduced in consequence of the reduction in working time under a new law. The strike ended July 7 in failure.

San Francisco—The employees of the street-railway companies quit work April 20 because of the discharge of union men. They won the point and the strike ended April 26.

WIDOWS OF PRESIDENTS AND VICE-PRESIDENTS.

Allowances, pensions and franking privileges granted by acts of congress:

Washington, Martha, widow of George Washington—Franking privilege.
Adams, Louise C., widow of John Quincy Adams—Franking privilege.
Harrison, Mrs., widow of William Henry Harrison—Allowance of \$25,000 and franking privilege.
Madison, Dolly P., widow of James Madison—Franking privilege.
Polk, Sarah C., widow of James K. Polk—Pension of \$5,000 a year.
Taylor, Margaret S., widow of Zachary Taylor—Franking privilege.
Dandridge, Bettie T., daughter of Gen. Zachary Taylor and widow of Col. William S. Bliss—Pension.

Gardner, Julia G., widow of John Tyler—Pension of \$5,000 a year.

Lincoln, Mary, widow of Abraham Lincoln—Allowance of \$25,000, pension of \$5,000 a year and franking privilege.

Grant, Julia Dent, widow of U. S. Grant—Pension of \$5,000 a year and franking privilege.

Garfield, Lucretia R., widow of James A. Garfield—Allowance of \$50,000, pension of \$5,000 a year and franking privilege.

Hendricks, Eliza C., widow of Thomas A. Hendricks—Allowance of \$8,750, being salary, mileage and stationery for one year.

McKinley, Ida S., widow of William McKinley—Pension of \$5,000 a year and franking privilege.

- Hannibal, Mo., over the Mississippi (1870-1871)—Length, between abutments, 1,582 feet; cost, \$648,500.
- Hanoi, over the Red river in Tonquin (1899-1902)—Indo-China railway bridge; steel; cantilever; 19 spans; length, 5,600 feet; cost, \$1,240,000; largest work of the kind on the Asiatic continent.
- Harlem (N. Y.) railroad bridge (1892-1895)—Length, 1,920 feet; cost, \$2,000,000.
- Harrisburg, Pa., over Susquehanna at Market street (1902-1903)—Length, 3,500 feet.
- Hayre de Grace, Md., over the Susquehanna (1861-1865)—Length, 6,316 feet; cost, \$1,500,000.
- Henderson, Ky., over the Ohio (1885)—Length, 3,688 feet; cost, \$2,086,506.
- Hudson river bridge, New York (authorized)—To cross the Hudson from West New York, near Guttenberg, to foot of 59 h street, New York; river span to be 2,730 feet long; height, 150 feet; width, 80 feet; estimated cost, \$17,000,000; with terminals, \$60,000,000.
- Kansas City bridge, over the Missouri—Cost, \$1,200,000.
- Kentucky & Indiana, over the Ohio at Louisville, Ky. (1887)—Length, 2,453 feet; cost, \$1,500,000; cantilever construction.
- Kiev, Russia, over Dnieper river (1883-1886)—Length, 4,590 feet; cost, \$1,950,000.
- Kinzua viaduct in McKean county, Pennsylvania (1882)—Height, 302 feet; length, 1,138 feet; cost, \$275,000.
- Lansdowne bridge, over the Indus river at Sukkur, India (1889)—Length, 1,430 feet; one span, 820 feet.
- Loa viaduct, Bolivia (1889)—Height, 336 feet; length, 800 feet.
- Leavenworth, Kas., over the Missouri (1894)—Length, 1,005 feet; cost, \$775,000.

- Lewiston-Queenston suspension bridge, over Niagara river (1899)—Length of suspended span, 800 feet; of cable span, 1,040 feet.
- Lion bridge, Sangang, China, over an arm of the Yellow sea (about 1780)—Length, 5 miles; height, 70 feet; 300 arches.
- London & Blackwall railway viaduct, England—Length, 3 miles; cost, \$5,419,755.
- London & Greenwich railway viaduct, England—Length, 3 miles; cost, \$3,900,000.
- London (Eng.) bridge across the Thames (1824-1831)—Length, 1,005 feet; stone-arch structure; cost, \$7,241,500.
- Louis I. bridge, Oporto, Spain (1886)—Span of main arch, 566 feet.
- Louisville (Ky.) bridge, over the Ohio (1870)—Wrought iron, truss construction; length, 5,294 feet; cost, \$1,500,000.
- Louisville & Jeffersonville, over the Ohio (1895)—Length, including viaducts on both sides, 10,560 feet; cantilever construction; cost, \$500,000.
- Malleco viaduct, Chile (1890)—Height, 333 feet; length, 1,419 feet; built of steel.
- Mandan-Bismarck, over the Missouri (1882)—Total length, 2,950 feet; cost, \$1,000,000.
- Marent gulch viaduct, west of Missoula, Mont. (1884)—Height, 201 feet; length, 796 feet; cost, \$178,105.
- Mayence, Germany, over the Rhine—Length, 3,200 feet.
- Memphis, Tenn., over the Mississippi (1883-1891)—Length, including approaches, 10,712 feet; of bridge proper, 5,297 feet.
- Merchants', St. Louis, over Mississippi (1889-1890)—Length, 2,420 feet; three spans, two of which are 521 feet 6 inches long each, and one of 523 feet 6 inches; cost, \$5,000,000.
- Minneapolis suspension—The old bridge, opened Jan. 23, 1855, was the first wire suspension bridge over the Mississippi; new bridge (1877) is 675 feet long.
- McComb's dam, New York—Total length, with approaches, 4,073 feet; cost, \$2,000,000.
- New London, Conn., over the Thames (1888-1889)—Length, 1,422 feet; draw-span, 502 feet.
- Newcastle (Eng.) high-level bridge (1849)—Length, 750 feet; cost, \$1,215,000.
- Niagara falls cantilever (1883)—Length, 910 feet; height, 250 feet; distance between piers, 495 feet.
- Niagara falls steel arch railway bridge (1897-1898)—Length, 1,100 feet; height, 226 feet; one span, 550 feet; cost, \$500,000.
- Niagara falls highway, electric road and foot bridge (1897-1898)—Greatest steel arch in the world; length of span between abutments, 840 feet.
- Omaha, Neb., over the Missouri (1893)—Total length, 2,790 feet; swing span, 520 feet; carries double-track railway, two roadways and two sidewalks; said to be the longest and heaviest swing-span bridge ever built.
- Pecos river viaduct, Texas, (1891)—Height, 326 feet; length, 2,180 feet; cost of metal work, \$175,000.
- Petrusse valley bridge, Luxemburg (under construction)—Has single-span arch of 275.5 feet; height, 144.4 feet; cost, \$270,000.
- Plattsburgh, Neb., over the Missouri (1879-1880)—Length, 4,450 feet.
- Point Pleasant, W. Va., over the Ohio (1882)—Length, 4,628 feet; cost, \$600,000.
- Portage viaduct, over Genesee river, New York (1875)—Height, 235 feet; length, 850 feet.
- Poughkeepsie, N. Y., over the Hudson (1886-1888)—Height, 212 feet; length, 6,767 feet; three spans of 548 feet each and two of 525 feet each; cost, \$2,600,000.
- Quebec bridge, over the St. Lawrence (under construction)—Will carry a double-track railway, two roadways and two sidewalks; weight, 35,000 tons; cost of superstructure alone, \$3,800,000; will have the longest cantilever span in the world, the clear opening of the central span being 1,800 feet and that of each of the anchorages 500 feet, or 2,800 feet from center to center of the anchorage piers.
- Quincy, Ill., over the Mississippi (1867-1868; rebuilt, 1897)—Total length, 3,741 feet; cost, \$1,500,000.

 Waterloo, London (1811-1817)—Length, 1,710 feet; cost, \$2,375,000.
 Weichsel river bridge, near Fordon, Germany (1891-1893)—Total length, 4,346 feet; cost, \$2,100,000; said to be largest bridge in Germany.
 White Pass & Yukon railroad bridge, Alaska—Total length, 850 feet; height, 275 feet.
 Winona, Minn., over the Mississippi (1890-1891)—Total length, 2,760 feet.

Yekaterinoslaf, Russia, over the Dnieper—Two-story highway and railway bridge; length, 4,094 feet.

NOTE.—The above list of great bridges and viaducts is necessarily incomplete, space permitting mention of only a few of the hundreds of notable structures of this kind in the world. It includes, however, most of those remarkable for size, cost and engineering skill displayed in their construction.

ARCTIC AND ANTARCTIC EXPLORATION.

Lieut. Robert E. Peary, U. S. N., and the members of his expedition arrived at Sydney, N. S., Sept. 18, in the steamer *Windward*, after a sojourn of more than four years in the arctic regions. The start was made from New York July 2, 1893, and the first year was spent in establishing headquarters at Etah in north Greenland and in making other preparations for a dash to the pole. The conditions in 1893 were not favorable and it was not until May, 1900, that he succeeded in reaching a high latitude. His record then was 83 deg. 50 min. north, the highest point attained up to that time in the western hemisphere. In the same month he succeeded in rounding the northern extremity of Greenland.

In 1901 the conditions were again unfavorable and nothing of importance was accomplished, but April 1, 1902, Lieut. Peary started on another trip northward over the polar sea. He took with him Hensen, the colored man who has accompanied him on most of his trips, four Eskimos and six sledges. After six marches open leads and floes in motion were encountered. Two of the natives were sent back. As the others advanced the floes became smaller, the pressure ridges larger and the open leads more numerous. Finally at 84 deg. 17 min. north latitude, northwest of Hecla, the polar pack became impracticable and further efforts to advance were given up. The party returned in safety to Cape Sabine and on the arrival of the *Windward*, Aug. 5, started for home by way of Godhavn. The scientific instruments and arctic library abandoned by the Greely expedition were recovered and brought back.

The arctic expedition under Capt. Otto Sverdrup also returned home after an extended stay in north Greenland. The start was made from Christiania, Norway, June 14, 1898, in the *Fram* (Forward), the vessel in which Nansen made his famous voyage. No attempt was made to reach the pole, but much valuable work was accomplished in the way of surveying, particularly along the south and west coasts of Ellesmere land and the hitherto unknown districts to the west of that region. The *Fram* was imprisoned in the ice in Jones sound, between Baffin bay and the Arctic ocean, for three years, and it was not until July, 1902, that the vessel was released by a heavy southern storm. Leaving Godhavn,

Greenland, Aug. 16, the expedition reached Christiania Sept. 28.

The finely equipped Baldwin-Ziegler expedition which left Tromsø, Norway, July 16, 1901, for Franz Josef land and the north pole proved a failure owing to dissensions between the leader, Evelyn B. Baldwin, and the sailing master and other officers. A number of supply camps were established up to 80 deg. 22 min., but nothing else was accomplished, and Baldwin returned to Honningsvåg, Norway, Aug. 1, 1902. Mr. Ziegler announced his purpose to continue the work of exploration with another commander in charge.

Word was received in August from the antarctic expedition under command of Prof. Otto Nordenskjöld which left Gothenburg, Sweden, Oct. 16, 1901, on the steamer *Antarctic*. The vessel when last heard from was imprisoned in the ice in the vicinity of Louis Philippe land and preparations had been made to proceed in dog sledges.

A Scotch antarctic expedition under the leadership of William S. Bruce sailed in the Norwegian whaler *Scotia* from the port of Troon, Scotland, Oct. 25. Its objective was the region south of the South Atlantic ocean between the zones being investigated by the Nordenskjöld and the Drygalski expeditions.

The record of the principal polar expeditions since 1853 now stands:

PIUS FUND ARBITRATION.

The first case to come before the international court of arbitration at The Hague was that involving a controversy between Mexico and the United States over the Pius fund. This was established in 1697 for the support of Roman catholic missions in the California and was placed in trust with the California Jesuits. In 1767 the Spanishcrown expelled the Jesuits from Mexico and California and turned the fund over to a commission afterward replaced by the Mexican government. When the upper part of California was ceded to the United States Mexico ceased paying the churches there the part of the fund due them. In

1869 Sir Edward Thornton, as umpire, awarded the United States \$904,700 for the period from 1848 to 1869. This Mexico paid, but refused to pay anything more. Renewed claims were made by the Roman catholic bishop of California and the matter was laid before the international court of arbitration at The Hague and Oct. 14, 1902, through its president, Dr. Matzen, the tribunal decided in favor of the United States. It was adjudged that Mexico should pay to the United States \$1,420,682.67 in Mexican currency, and from Feb. 2, 1903, and on the same date each year thereafter forever \$43,050.99 in Mexican money.

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided between Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan.

PROCEEDINGS AGAINST THE "BEEF TRUST."

On the 24th of April, 1902, after an investigation by Attorney-General Knox and other officers of the government, the prosecution of the so-called "beef trust" was ordered by the president and on the 10th of May a petition for an injunction was filed in the United States Circuit court for the northern district of Illinois. It was directed against Swift & Co., Armour & Co., the Hammond Packing company, Schwarzschild & Sulzberger company, Nelson Morris & Co. and a number of individuals connected with the packing firms named. The proceeding was based upon the Sherman law making combinations in restraint of trade illegal.

In the bill the defendants were charged with an unlawful combination and conspiracy in directing their purchasing agents not to bid against each other in buying live stock and in bidding up the prices of live stock for a few days at a time so as to induce heavy shipments to the yards by owners and then, by refraining from making competitive bids, obtaining such live stock at lower prices than it would bring in the regular way of trade. The bill further alleged:

"The defendants, arbitrarily, from time to time raise, lower and fix prices and maintain uniform prices at which they will sell fresh meats. The arbitrary raising, lowering, fixing and maintaining of prices is being effected through the action of divers of their agents and attorneys to your petitioner unknown, in secretly holding periodical meetings and agreeing upon the prices to be adopted by the defendants, to

be enforced by them until at a subsequent meeting the same may be changed, which said prices are notified by letters and telegrams in plain language and divers codes and ciphers, and they have been and are maintained by defendants.

"The defendants have engaged in arrangements and agreements with officers and agents of such common carriers whereby said defendants were to receive and have received by means of rebates and other devices unlawful rates for transportation, much less than the said lawful rates, and were to exclusively enjoy and share said unlawful advantage to the exclusion of competitors and would-be competitors and the general public."

On the strength of these and other allegations, which are characterized as "in restraint of trade and commerce," the government asked that the packers be enjoined from continuing their unlawful proceedings.

May 20 Judge Peter S. Grosscup of the United States Circuit court in Chicago issued the temporary injunction asked for and the defendants were ordered not to do the things complained of in the bill. They were given until Aug. 4 to make their reply. On the date named the Chicago packers filed a demurrer in which they asked that the petition be dismissed on the ground that it contained several matters and causes bearing no relation to each other and could not therefore be embraced in one suit. The charges of the government were not denied, but were met with the objection that they were multifarious and did not concern all the defendants.

END OF THE ANGLO-BOER WAR.

War began Oct. 10, 1899.

War ended May 31, 1902.

Lives lost—British, 22,143; Boer (estimated), 3,700.

Cost of war to British, about \$755,000,000.

The war between Great Britain and the Dutch republics in South Africa, after lasting two years and eight months, came to an end Saturday, May 31, 1902, when a treaty of peace was signed at Pretoria by representatives of the Boers and by Lord Milner and Gen. Kitchener for the British. Holland made an offer of mediation on the 25th of January, but it was rejected by Lord Lansdowne and the war continued. There were many casualties on both sides, though no great battles were fought. The Boers lost several of their commanders by death and many of their men by capture. The most notable reverse for the British was the defeat March 7, 1902, of a force of 1,200 men under Lord Methuen, who was wounded and compelled to surrender with 200 of his men to Gen. Delarey. Gen. Kitchener made the most determined efforts to capture Dewet, Botha and Delarey, but failed.

Negotiations for peace began in the latter part of March and several conferences were held at Pretoria and elsewhere in April and May. The British terms were submitted to the burghers in the field, and on the 28th of May the Boer representatives were given until midnight of the last day of the month to come to a decision, with the result already noted. In effect the terms agreed upon were:

The burgher forces in the field will lay down their arms and desist from further

resistance and acknowledge King Edward VII. as their lawful sovereign.

All prisoners are to be brought back so soon as possible to South Africa, without loss of liberty or property.

No proceeding, civil or criminal, will be taken against any burghers for any acts in connection with the prosecution of the war. The benefits of this clause do not extend to certain acts contrary to the usages of war.

The Dutch language will be taught in the public schools of the Transvaal and Orange River Colony where the parents desire it and will be allowed in the courts of law for the better and more effectual administration of justice.

Possession of rifles will be allowed to persons requiring them for their protection on taking out a license.

The military administration of the Transvaal and Orange River Colony will, at the earliest possible date, be succeeded by a civil government, and, so soon as circumstances permit, representative institutions, leading up to self-government, will be introduced.

No special tax will be imposed on landed property in the Transvaal or Orange River Colony to defray the expenses of the war.

The sum of three million sterling is to be provided for restocking the Boers' farms.

The surrender was completed June 17.

According to a statement made in parliament the total British force in the field from first to last was 17,559 officers and 430,876 men. Of these 718 officers and 5,256 men were killed in battle and 554 officers and 15,615 men died from wounds; total dead, 22,143.

PENSIONS ON AMERICAN RAILROADS.

[From the Railroad Gazette.]

Seven of the great railroad systems of America give pensions to employes who have been in their service for twenty-five years or more when they have reached the age of 65. The conditions of retirement vary on the different roads, but essentially the system is the same. On the Chicago & Northwestern an employe, to receive a pension, must have been in the service twenty years, on the Lackawanna twenty-five years and on the Illinois Central ten; on the Pennsylvania there is no limit in this respect except that employes are not to be pensioned under the 65-year limit unless they have served thirty years. On the Illinois Central outdoor employes may be retired at 65 years; all employes may be at 60 years if incapacitated; all must be

retired at 70 without regard to whether or not they have served long enough to receive a pension.

The pensions are graded according to average salary received during the last ten years of service. For example, if for the last ten years his monthly pay has equaled \$60 a month and his term of service thirty years the pension will be \$18 a month—equal to 1 per cent a year (thirty years) on \$60. On the Baltimore & Ohio the pension fund is supported mainly or wholly by the employes; on the Grand Trunk each man pays 2½ per cent of his salary, the company putting in an equal amount, and the pension is 1-2-3 per cent of the man's salary, multiplied by the number of years that he has contributed to the pension fund.

BASEBALL.

SEASON OF 1902.

The rivalry of the two leading baseball organizations of the country—the National league and the American league—continued during the season of 1902, with the result that while some of the owners may have lost money the public enjoyed good sport and the players large salaries. In the cities having strong teams the attendance was unusually large, proving that baseball is still the national game. In the territory formerly occupied by the Western league there were two rival organizations—the American association and the Western league.

WESTERN UNIVERSITIES.

The following record of games played with each other by the nines of some of the leading schools of the middle west in 1902 is not particularly significant so far as the championship is concerned. The schedule did not permit of any conclusive comparison of merits. Illinois, Wisconsin and Beloit had the strongest teams in the field.

YACHTING.

7, and La Rita, owned by George R. Peare, won in each of the three races. The course for the first contest was over a triangle, two miles to each leg, the course twice over. La Rita, Arab IV., Spray, Privateer and Colleen finished in the order named. Winner's time, 2:20:06. The course for the second race was 3 miles to leeward and return, twice over. Owing to a series of mishaps only La Rita and Arab IV. com-

peted, the former winning with ten minutes to spare. The third and final race was over a quadrangular course, three miles to a leg. La Rita again won, coming three minutes and twenty-five seconds ahead of Sprite, the only other boat entered. Elapsed time, La Rita, 2:35:35; Sprite, 2:59.

SEAWANHAKA CUP RACES.

The annual international contest for the Seawanhaka cup for small yachts took place on Lake St. Louis, off Montreal, Aug. 7, 8, 9 and 11, and resulted in favor of the Canadian defender, the Trident of the Royal St. Lawrence Yacht club. The challenger was the Oshkosh-built boat, the Tecumseh of the Bridgeport (N. Y.) Yacht club. The first race was a beat to windward and return, four miles, sailed three times over, a total distance of twelve miles. Elapsed time: Trident, 1:58:21; Tecumseh, 2:13:13, or 14:52 in favor of the Trident. The course for the second race was triangular, three times around, the first leg being a beat, the second a reach and the third a free run. Tecumseh won by 1:22. Elapsed time: Tecumseh, 2:27:35; Trident, 2:28:47. For the third race the course was to windward and return, each leg two miles, sailed three times over. Trident won, her elapsed time being 2:06:31 to 2:10:42 for Tecumseh. Trident also won the fourth race and the cup by defeating the Tecumseh on the triangular course by 1:49:55 to 1:55:22.

NEW YORK YACHT CLUB CONTEST.

Henry S. Redmond's English yacht Allsa won the \$500 Astor cup by defeating the 72-footers Rainbow, Yankee and Mineola in a 38-mile race off Newport Aug. 6. On the same day and course the \$1,000 Astor cup was won by F. F. Brewster's Elmina after a close race with Charles Smithers' Muriel. In the 37-mile run from Newport to Vineyard Haven Aug. 7 the Constellation broke the record for the course and won the race for the large schooner class by covering the distance in 3:32:15. Corona won in class B and Elmina

in class D. For sloops Yankee won in class H, Queen Mab in class I, Humma in class K and Ondawa in class L.

LAKE MICHIGAN YACHTING ASSOCIATION REGATTA.

This was held on Macatawa bay, Michigan, Aug. 7, 8 and 9, under unsatisfactory weather conditions. The prizes were awarded to Sallie in the schooner class; Vencedor, class 1A; Illinois, class 2A; La Rita, class 3A; Beatrice, class 2B; Eleanor II., class 4A, and Snipe, class 4B. Macatawa won the cup offered by the Macatawa Bay Yacht club for yachts of the "sidewalk" type. On the last day the breeze was so light that of all the boats entered only the Illinois and La Rita finished within the time allowed. The Illinois covered the twelve miles of the course in 2:00:00 and La Rita in 2:34:36.

CHICAGO-MICHIGAN CITY RACES.

Sailed June 14; won by Commodore Fred Price's sloop Vencedor in 3:38:55, with Siren second in 3:46:30. In the special 21-foot class A contest La Rita was first in 4:43:08 and Privateer second in 4:47:18.

THE AMERICA'S CUP.

The thirteenth international contest for the America's cup will take place in August, 1903, over the same courses and under the same conditions as in 1901. Oct. 7, 1902, the secretary of the Royal Ulster Yacht club, on behalf of Sir Thomas Lipton, Bart., K. C. V. O., a member of the club, mailed a challenge to the New York Yacht club which was officially accepted Oct. 16. By the terms of the challenge the first race is to be sailed on Thursday, Aug. 20, 1903; the second on Saturday, Aug. 22, and the third on Tuesday, Aug. 25. Any further races, if any are required, are to be sailed on each following Thursday, Saturday and Tuesday until finished. The name of the challenging yacht is Shamrock III., its length on the load water line is ninety feet and it is cutter rigged.

RECORD OF PREVIOUS RACES.

1851—Aug. 22. In this, the year of the great exhibition in London, the Royal Yacht club of England offered a cup to the winner of a yacht race around the Isle of Wight. The course was 60 miles in length and was won by the schooner-yacht America, designed by George Steers for John C.

Stevens of the New York Yacht club. The America was 94 feet over all, 88 feet on the water line, 22½ feet beam and 11½ feet draught. There was no time allowance and the competing yachts ranged in size from a three-masted 392-ton schooner, the Brilliant, to the 47-ton cutter, the Aurora, which came in second in the race. The

time of the America was 10 hours and 34 minutes; that of the Aurora was 24 minutes slower. The cup after that became known as the America's cup and has now been successfully defended for fifty years.

THE CANADA CUP.

The first race for the Canada cup, a trophy valued at \$1,000, was sailed at Toledo in 1896 and was won by the Canada of the Royal Canadian Yacht club. The challenging boat was the Vencedor. In 1899 the Genesee of Rochester, representing the Chicago Yacht club, won the cup at Toronto by defeating the defender, Beaver, in the first three races sailed. In 1901 the challenging yacht was the Invader of the Royal Canadian Yacht club of Toronto and the defender the Cadillac of Detroit, flying the colors of the Chicago Yacht club. The races took place at Chicago Aug. 10, 12, 13 and 14. The first was won by the Cadillac, but the Invader won the second, third (on a foul) and fourth, and was awarded the trophy.

SCULLING.

George Towns of Australia won the world's sculling championship by defeating Jake Gaudaur at Rat Portage, Ont., Sept. 7, 1901. Towns covered the distance, three miles, in 20:32. The world's record for the distance is 19:01 $\frac{1}{2}$; it was made by Gaudaur in Texas.

SWIMMING.

At the sportsmen's show in the Coliseum, Chicago, Feb. 19, Howard F. Brewer of the Olympic Athletic club, San Francisco, won the American Athletic union swimming championship by defeating E. Carroll Schaeffer and Fred A. Wenck in a 600-yard race. His time was 8:25 flat, or 53 $\frac{1}{2}$ seconds better than the former American record held by Stanley B. French of England since 1896.

At the same place Feb. 20 Brewer lowered three other American records by making 700 yards in 10:02 $\frac{1}{2}$, 800 yards in 11:31 $\frac{1}{2}$ and a half mile in 12:39 $\frac{1}{2}$. Feb. 22 he set new records for intermediate distances as follows: 540 yards, 7:45 $\frac{1}{2}$; 640 yards, 9:14 $\frac{1}{2}$;

680 yards, 9:51%; 740 yards, 10:46; 1,320 yards, 19:34.

W. J. Tuttle of the Illinois Naval Reserve team made a new record Feb. 13 for 40 yards. His time was :23½.

Feb. 15 J. Scott Leary of San Francisco made 20 yards in :10 flat—a world's record.

Fred Wieland of the Central Y. M. C. A., Chicago, won the 100, 200 and 500 yard races for the championship of the Central association of the Amateur Athletic union. All the above races took place at the sports-men's show in Chicago in February.

At the New York Athletic club Feb. 15

Charles Ruberl lowered the American amateur record for 200 yards to 2:35%.

At the A. A. U. swimming championship at Travers island the 440-yard race was won by E. C. Schaeffer, unattached; Charles Ruberl, New York A. C., second; Budd Goodwin, Knickerbocker A. C., third. Time, 6:18%; new American record; old record, 6:19%; by Schaeffer.

The one-mile race was also won by E. C. Schaeffer; Otto Wahle, New York A. C., second; Fred A. Wenck, New York A. C., third. Time, 28:14%; new American record; old record, 28:31%.

LONG-DISTANCE RACING.

The European long-distance race of the year was that from Paris—or, more strictly speaking, Champigny—to Vienna, a distance of about 825 miles. It was run June 26-29 and Marcel Renault of Paris was the victor, whose time was 26 hours and 11 minutes.

The other four of the first five to finish were: Henry Farman second in 26:31, M. Edmond third in 26:40; Maurice Farman fourth in 26:51 and Count Zborowsky fifth in 26:58. The time given is that occupied in covering the course, leaving out of consideration the time consumed in traversing the neutralized territory in Switzerland.

The Gordon Bennett international cup race from Champigny to Innsbruck was won by S. F. Edge. His time from Champigny to Belfort and from Bregenz to Innsbruck was 10 hours 41 minutes and 55 seconds.

WHIST.

The annual tournament of the American Whist league congress took place at Manhattan Beach, N. Y., June 23-28. The Hamilton trophy (fours) was won by Cleveland, the Minneapolis (pairs) by Milwaukee, the Brooklyn by New York, the Milwaukee by New York, the A. W. L. challenge trophy by Philadelphia and the associate members' trophy by New Jersey. Cleveland had the winning pairs for men and Syracuse the winning pairs in mixed games. Mr. W. S. Jones of Minneapolis had the highest individual score. Officers of the American Whist league elected at the congress: President, John T. Mitchell, Chicago; corresponding secretary, Clarence W. Vail, Brooklyn, N. Y.

At the Women's Whist league congress in New York May 2 the New Amsterdam

club won the Toledo trophy, Baltimore captured the Washington trophy and the Cavendish club of Boston won the trophy of the same name. Officers elected: President,

Mrs. Henry T. Fry, Chicago; secretary, Mrs. Silas W. Pettit, Philadelphia. The next congress is to be held in Chicago.

RECORD FOR SPEED ON WATER.

The twin-screw yacht Arrow, owned by Charles R. Flint, ran a nautical mile (6,080 feet) in 92 seconds on the Hudson river, between Ardsley and Irvington, Saturday, Sept. 6. This speed is equivalent to

a trifle more than forty-four statute miles an hour, or 1.056 miles in a day. The Arrow is 130 feet long and 12.5 beam. The engines are quadruple expansion and the indicated horse power approximately 4,000.

LARGEST LOCOMOTIVE.

What is said to be one of the largest locomotives in the world is in use on the Santa Fe railroad hauling freight trains. It weighs 260,000 pounds, has ten drive wheels, is seventy feet long from the tip

of the pilot to the end of the tender and is sixteen feet high from the ties to the top of the smokestack. Its tractive power is 53,900 pounds.

THE AMERICAN BUFFALO.

From investigations made by the secretary of the interior it appears that in the spring of 1902 there were in existence in the United States 1,143 American bison or buffalo. Of these 72 were running wild, 50

in Colorado and 22 in Yellowstone park. The total number of pure-blooded animals was 968.

Canada reported 600 wild buffalo and 69 in captivity.

THE PRESIDENT'S MESSAGE.

(To the 57th congress, second session.)

To the Senate and House of Representatives: We still continue in a period of unbounded prosperity. This prosperity is not the creature of law, but undoubtedly the laws under which we work have been instrumental in creating the conditions which made it possible, and by unwise legislation it would be easy enough to destroy it. There will undoubtedly be periods of depression. The wave will recede, but the tide will advance. This nation is seated on a continent flanked by two great oceans. It is composed of men the descendants of pioneers, or, in a sense, pioneers themselves; of men winnowed out from among the nations of the old world by the energy, boldness and love of adventure found in their own eager hearts. Such a nation, so placed, will surely wrest success from fortune.

As a people we have played a large part in the world, and we are bent upon making our future even larger than the past. In particular, the events of the last four years have definitely decided that, for woe or for weal, our place must be great among the nations. We may either fail greatly or succeed greatly; but we cannot avoid the endeavor from which either great failure or great success must come. Even if we would we cannot play a small part. If we should try, all that would follow would be that we should play a large part ignobly and shamefully.

But our people, the sons of the men of the civil war, the sons of the men who had iron in their blood, rejoice in the present and face the future high of heart and resolute of will. Ours is not the creed of the weakling and the coward; ours is the gospel of hope and of triumphant endeavor. We do not shrink from the struggle before us. There are many problems for us to face at the outset of the twentieth century—grave problems abroad and still graver at home; but we know that we can solve them and solve them well, provided only that we bring to the solution the qualities of head and heart which were shown by the men who in the days of Washington founded this government and in the days of Lincoln preserved it.

No country has ever occupied a higher plane of material well-being than ours at the present moment. This well-being is due to no sudden or accidental causes, but to the play of the economic forces in this country for over a century; to our laws, our sustained and continuous policies; above all, to the high individual average of our citizenship. Great fortunes have been won by those who have taken the lead in this phenomenal industrial development, and most of these fortunes have been won not by doing evil but as an incident to action which has benefited the community as a whole. Never before has material well-being been so widely diffused among our people. Great fortunes have been accumulated, and yet in the aggregate these fortunes are small indeed when compared to the wealth of the people as a whole. The plain people are better off than they have ever been before. The insurance companies, which are practically mutual-benefit societies—especially helpful to men of moderate means—represent accumulations of capital which are among the largest in this country. There are more deposits in the savings banks, more owners of farms, more well-

paid wage workers in this country now than ever before in our history. Of course when the conditions have favored the growth of so much that was good they have also favored somewhat the growth of what was evil. It is eminently necessary that we should endeavor to cut out this evil, but let us keep a due sense of proportion; let us not in fixing our gaze upon the lesser evil forget the greater good. The evils are real and some of them are menacing, but they are the outgrowth not of misery or decadence but of prosperity—of the progress of our gigantic industrial development. This industrial development must not be checked, but side by side with it should go such progressive regulation as will diminish the evils. We should fall in our duty if we did not try to remedy the evils, but we shall succeed only if we proceed patiently, with practical common sense as well as resolution, separating the good from the bad and holding on to the former while endeavoring to get rid of the latter.

REGULATION OF TRUSTS.

In my message to the present congress at its first session I discussed at length the question of the regulation of those big corporations commonly doing an interstate business, often with some tendency to monopoly, which are popularly known as trusts. The experience of the last year has emphasized in my opinion the desirability of the steps I then proposed. A fundamental requisite of social efficiency is a high standard of individual energy and excellence; but this is in nowise inconsistent with power to act in combination for aims which cannot so well be achieved by the individual acting alone. A fundamental base of civilization is the inviolability of property; but this is in nowise inconsistent with the right of society to regulate the exercise of the artificial powers which it confers upon the owners of property under the name of corporate franchises in such a way as to prevent the misuse of these powers. Corporations, and especially combinations of corporations, should be managed under public regulation. Experience has shown that under our system of government the necessary supervision cannot be obtained by state action. It must therefore be achieved by national action. Our aim is not to do away with corporations; on the contrary, these big aggregations are an inevitable development of modern industrialism, and the effort to destroy them would be futile unless accomplished in ways that would work the utmost mischief to the entire body politic. We can do nothing of good in the way of regulating and supervising these corporations until we fix clearly in our minds that we are not attacking the corporations but endeavoring to do away with any evil in them. We are not hostile to them; we are merely determined that they shall be so handled as to subserve the public good. We draw the line against misconduct, not against wealth. The capitalist who alone or in conjunction with his fellows performs some great industrial feat by which he wins money is a well-doer, not a wrong-doer, provided only he works in proper and legitimate lines. We wish to favor such a man when he does well. We wish to supervise and control his actions only to prevent him from doing ill. Publicity can do no harm

to the honest corporation and we need not be overtender about sparing the dishonest corporation.

In curbing and regulating the combinations of capital which are or may become injurious to the public we must be careful not to stop the great enterprises which have legitimately reduced the cost of production, not to abandon the place which our country has won in the leadership of the international industrial world, not to strike down wealth with the result of closing factories and mines, of turning the wage worker idle in the streets and leaving the farmer without a market for what he grows. Insistence upon the impossible means delay in achieving the possible, exactly as, on the other hand, the stubborn defense alike of what is good and what is bad in the existing system, the resolute effort to obstruct any attempt at betterment, betrays blindness to the historic truth that wise evolution is the sure safeguard against revolution.

No more important subject can come before the congress than this of the regulation of interstate business. This country cannot afford to sit supine on the plea that under our peculiar system of government we are helpless in the presence of the new conditions and unable to grapple with them or to cut out whatever of evil has arisen in connection with them. The power of the congress to regulate interstate commerce is an absolute and unqualified grant and without limitations other than those prescribed by the constitution. The congress has constitutional authority to make all laws necessary and proper for executing this power and I am satisfied that this power has not been exhausted by any legislation now on the statute books. It is evident, therefore, that evils restrictive of commercial freedom and entailing restraint upon national commerce fall within the regulative power of the congress and that a wise and reasonable law would be a necessary and proper exercise of congressional authority to the end that such evils should be eradicated.

I believe that monopolies, unjust discriminations which prevent or cripple competition, fraudulent overcapitalization and other evils in trust organizations and practices which injuriously affect interstate trade can be prevented under the power of the congress to "regulate commerce with foreign nations and among the several states" through regulations and requirements operating directly upon such commerce, the instrumentalities thereof and those engaged therein.

I earnestly recommend this subject to the consideration of the congress with a view to the passage of a law reasonable in its provisions and effective in its operations, upon which the questions can be finally adjudicated that now raise doubts as to the necessity of constitutional amendments. If it prove impossible to accomplish the purposes above set forth by such a law, then assuredly we should not shrink from amending the constitution so as to secure beyond peradventure the power sought.

The congress has not heretofore made any appropriation for the better enforcement of the antitrust law as it now stands. Very much has been done by the department of justice in securing the enforcement of this law, but much more could be done if congress would make a special appropriation for this purpose, to be expended under the direction of the attorney-general.

TARIFF REVISION.

One proposition advocated has been the reduction of the tariff as a means of reaching the evils of the trusts which fall within the category I have described. Not merely would this be wholly ineffective, but the diversion of our efforts in such a direction would mean the abandonment of all intelligent attempt to do away with these evils. Many of the largest corporations, many of those which should certainly be included in any proper scheme of regulation, would not be affected in the slightest degree by a change in the tariff, save as such change interfered with the general prosperity of the country. The only relation of the tariff to big corporations as a whole is that the tariff makes manufactures profitable, and the tariff remedy proposed would be in effect simply to make manufactures unprofitable. To remove the tariff as a punitive measure directed against trusts would inevitably result in ruin to the weaker competitors who are struggling against them. Our aim should be not by unwise tariff changes to give foreign products the advantage over domestic products, but by proper regulation to give domestic competition a fair chance, and this end cannot be reached by any tariff changes which would affect unfavorably all domestic competitors, good and bad alike. The question of regulation of the trusts stands apart from the question of tariff revision.

Stability of economic policy must always be the prime economic need of this country. This stability should not be fossilization. The country has acquiesced in the wisdom of the protective-tariff principle. It is exceedingly undesirable that this system should be destroyed or that there should be violent and radical changes therein. Our past experience shows that great prosperity in this country has always come under a protective tariff, and that the country cannot prosper under fitful tariff changes at short intervals. Moreover, if the tariff laws as a whole work well, and if business has prospered under them and is prospering, it is better to endure for a time slight inconveniences and inequalities in some schedules than to upset business by too quick and too radical changes. It is most earnestly to be wished that we could treat the tariff from the standpoint solely of our business needs. It is perhaps too much to hope that partisanship may be entirely excluded from consideration of the subject, but at least it can be made secondary to the business interests of the country—that is, to the interests of our people as a whole. Unquestionably these business interests will best be served if together with fixity of principle as regards the tariff we combine a system which will permit us from time to time to make the necessary reapplication of the principle to the shifting national needs. We must take scrupulous care that the reapplication shall be made in such a way that it will not amount to a dislocation of our system, the mere threat of which (not to speak of the performance) would produce paralysis in the business energies of the community. The first consideration in making these changes would, of course, be to preserve the principle which underlies our whole tariff system—that is, the principle of putting American business interests at least on a full equality with interests abroad, and of always allowing a sufficient rate of duty to more than cover the difference between the labor cost

here and abroad. The well-being of the wage worker, like the well-being of the tiller of the soil, should be treated as an essential in shaping our whole economic policy. There must never be any change which will jeopardize the standard of comfort, the standard of wages of the American wage worker.

RECIPROCITY TREATIES.

One way in which the readjustment sought can be reached is by reciprocity treaties. It is greatly to be desired that such treaties may be adopted. They can be used to widen our markets and to give a greater field for the activities of our producers on the one hand, and on the other hand to secure in practical shape the lowering of duties when they are no longer needed for protection among our own people or when the minimum of damage done may be disregarded for the sake of the maximum of good accomplished. If it prove impossible to ratify the pending treaties and if there seem to be no warrant for the endeavor to execute others or to amend the pending treaties so that they can be ratified, then the same end—to secure reciprocity—should be met by direct legislation.

Wherever the tariff conditions are such that a needed change cannot with advantage be made by the application of the reciprocity idea then it can be made outright by a lowering of duties on a given product. If possible such change should be made only after the fullest consideration by practical experts, who should approach the subject from a business standpoint, having in view both the particular interests affected and the commercial well-being of the people as a whole. The machinery for providing such careful investigation can readily be supplied. The executive department has already at its disposal methods of collecting facts and figures, and if the congress desires additional consideration to that which will be given the subject by its own committees then a commission of business experts can be appointed whose duty it should be to recommend action by the congress after a deliberate and scientific examination of the various schedules as they are affected by the changed and changing conditions. The unhurried and unbiased report of this commission would show what changes should be made in the various schedules and how far these changes could go without also changing the great prosperity which this country is now enjoying or upsetting its fixed economic policy.

The cases in which the tariff can produce a monopoly are so few as to constitute an inconsiderable factor in the question. But of course if in any case it be found that a given rate of duty does promote a monopoly which works ill no protectionist would object to such reduction of the duty as would equalize competition.

In my judgment the tariff on anthracite coal should be removed and anthracite put actually, where it now is nominally, on the free list. This would have no effect at all save in crises, but in crises it might be of service to the people.

REFORMS OF MONETARY SYSTEM.

Interest rates are a potent factor in business activity, and in order that these rates may be equalized to meet the varying needs of the seasons and of widely separated communities, and to prevent the recurrence of financial stringencies which injuriously

affect legitimate business, it is necessary that there should be an element of elasticity in our monetary system. Banks are the natural servants of commerce and upon them should be placed, as far as practicable, the burden of furnishing and maintaining a circulation adequate to supply the needs of our diversified industries and of our domestic and foreign commerce, and the issue of this should be so regulated that a sufficient supply should be always available for the business interests of the country.

It would be both unwise and unnecessary at this time to attempt to reconstruct our financial system, which has been the growth of a century, but some additional legislation is, I think, desirable. The mere outline of any plan sufficiently comprehensive to meet these requirements would transgress the appropriate limits of this communication. It is suggested, however, that all future legislation on the subject should be with the view of encouraging the use of such instrumentalities as will automatically supply every legitimate demand of productive industries and of commerce, not only in the amount but in the character of circulation, and of making all kinds of money interchangeable and at the will of the holder convertible into the established gold standard.

I again call your attention to the need of passing a proper immigration law covering the points outlined in my message to you at the first session of the present congress. Substantially such a bill has already passed the house.

CAPITAL AND LABOR.

How to secure fair treatment alike for labor and for capital, how to hold in check the unscrupulous man, whether employer or employe, without weakening individual initiative, without hampering and cramping the industrial development of the country, is a problem fraught with great difficulties and one which it is of the highest importance to solve on lines of sanity and far-sighted common sense as well as of devotion to the right. This is an era of federation and combination. Exactly as business men find they must often work through corporations and it is a constant tendency of these corporations to grow larger, so it is often necessary for laboring men to work in federations, and these have become important factors of modern industrial life. Both kinds of federation—capitalistic and labor—can do much good, and as a necessary corollary they can both do evil. Opposition to each kind of organization should take the form of opposition to whatever is bad in the conduct of any given corporation or union; not of attacks upon corporations as such nor upon unions as such, for some of the most far-reaching beneficent work for our people has been accomplished through both corporations and unions. Each must refrain from arbitrary or tyrannous interference with the rights of others. Organized capital and organized labor alike should remember that in the long run the interest of each must be brought into harmony with the interest of the general public, and the conduct of each must conform to the fundamental rules of obedience to the law, of individual freedom and of justice and fair dealing toward all. Each should remember that in addition to power it must strive after the realization of healthy, lofty and generous ideals. Every employer, every wage worker, must be guaranteed his liberty and

his right to do as he likes with his property or his labor so long as he does not infringe upon the rights of others. It is of the highest importance that employer and employe alike should endeavor to appreciate each the viewpoint of the other and the sure disaster that will come upon both in the long run if either grows to take as habitual an attitude of sour hostility and distrust toward the other.

Few people deserve better of the country than those representatives both of capital and labor—and there are many such—who work continually to bring about a good understanding of this kind based upon wisdom and upon broad and kindly sympathy between employers and employed. Above all, we need to remember that any kind of class animosity in the political world is, if possible, even more wicked, even more destructive to national welfare, than sectional, race or religious animosity. We can get good government only upon condition that we keep true to the principles upon which this nation was founded and judge each man not as a part of a class but upon his individual merits. All that we have a right to ask of any man, rich or poor, whatever his creed, his occupation, his birthplace or his residence, is that he shall act well and honorably by his neighbor and by his country. We are neither for the rich man as such nor for the poor man as such—we are for the upright man, rich or poor. So far as the constitutional powers of the national government touch these matters of general and vital moment to the nation they should be exercised in conformity with the principles above set forth.

SECRETARY OF COMMERCE.

It is earnestly hoped that a secretary of commerce may be created, with a seat in the cabinet. The rapid multiplication of questions affecting labor and capital, the growth and complexity of the organizations through which both labor and capital now find expression, the steady tendency toward the employment of capital in huge corporations and the wonderful strides of this country toward leadership in the international business world justify an urgent demand for the creation of such a position. Substantially all the leading commercial bodies in this country have united in requesting its creation. It is desirable that some such measure as that which has already passed the senate be enacted into law. The creation of such a department would in itself be an advance toward dealing with an exercising supervision over the whole subject of the great corporations doing an interstate business; and with this end in view the congress should endow the department with large powers, which could be increased as experience might show the need.

CUBAN RECIPROCITY TREATY.

I hope soon to submit to the senate a reciprocity treaty with Cuba. On May 20 last the United States kept its promise to the island by formally vacating Cuban soil and turning Cuba over to those whom her own people had chosen as the first officials of the new republic.

Cuba lies at our doors and whatever affects her for good or for ill affects us also. So much have our people felt this that in the Platt amendment we definitely took the ground that Cuba must hereafter have closer political relations with us than with any other power. Thus in a sense Cuba has become a part of our interna-

tional political system. This makes it necessary that in return she should be given some of the benefits of becoming a part of our economic system. It is, from our own standpoint, a short-sighted and mischievous policy to fail to recognize this need. Moreover, it is unworthy of a mighty and generous nation, itself the greatest and most successful republic in history, to refuse to stretch out a helping hand to a young and weak sister republic just entering upon its career of independence. We should always fearlessly insist upon our rights in the face of the strong, and we should with ungrudging hand do our generous duty by the weak. I urge the adoption of reciprocity with Cuba not only because it is eminently for our own interests to control the Cuban market and by every means to foster our supremacy in the tropical lands and waters south of us but also because we of the giant republic of the north should make all our sister nations of the American continent feel that whenever they will permit it we desire to show ourselves disinterestedly and effectively their friend.

TRADE RELATIONS WITH GREAT BRITAIN.

A convention with Great Britain has been concluded, which will be at once laid before the senate for ratification, providing for reciprocal trade arrangements between the United States and Newfoundland on substantially the lines of the convention formerly negotiated by the secretary of state, Mr. Blaine. I believe reciprocal trade relations will be greatly to the advantage of both countries.

As civilization grows warfare becomes less and less the normal condition of foreign relations. The last century has seen a marked diminution of wars between civilized powers. Wars with uncivilized powers are largely mere matters of international police duty essential for the welfare of the world. Wherever possible arbitration or some similar method should be employed in lieu of war to settle difficulties between civilized nations, although as yet the world has not progressed sufficiently to render it possible or necessarily desirable to invoke arbitration in every case. The formation of the international tribunal which sits at The Hague is an event of good omen from which great consequences for the welfare of all mankind may flow. It is far better, where possible, to invoke such a permanent tribunal than to create special arbitrators for a given purpose.

It is a matter of sincere congratulation to our country that the United States and Mexico should have been the first to use the good offices of The Hague court. This was done last summer with most satisfactory results in the case of a claim at issue between us and our sister republic. It is earnestly to be hoped that this first case will serve as a precedent for others in which not only the United States but foreign nations may take advantage of the machinery already in existence at The Hague.

I commend to the favorable consideration of the congress the Hawaiian fire claims, which were the subject of careful investigation during the last session.

THE ISTHMIAN CANAL.

The congress has wisely provided that we shall build at once an isthmiian canal, if possible at Panama. The attorney-gen-

eral reports that we can undoubtedly acquire good title from the French Panama Canal company. Negotiations are now pending with Colombia to secure her assent to our building the canal. This canal will be one of the greatest engineering feats of the twentieth century—a greater engineering feat than has yet been accomplished during the history of mankind. The work should be carried out as a continuing policy without regard to change in administration, and it should be begun under circumstances which will make it a matter of pride for all administrations to continue the policy.

The canal will be of great benefit to America and of importance to all the world. It will be an advantage to us industrially and also as improving our military position. It will be of advantage to the countries of tropical America. It is earnestly to be hoped that all of these countries will do as some of them have already done with signal success and will invite to their shores commerce and improve their material conditions by recognizing that stability and order are the prerequisites of successful development. No independent nation in America need have the slightest fear of aggression from the United States. It behoves each one to maintain order within its own borders and to discharge its just obligations to foreigners. When this is done they can rest assured that, be they strong or weak, they have nothing to dread from outside interference. More and more the increasing interdependence and complexity of international political and economic relations render it incumbent on all civilized and orderly powers to insist on the proper policing of the world.

CABLE TO THE PHILIPPINES.

During the fall of 1901 a communication was addressed to the secretary of state asking whether permission would be granted by the president to a corporation to lay a cable from a point on the California coast to the Philippine islands by way of Hawaii. A statement of conditions or terms upon which such corporation would undertake to lay and operate a cable was volunteered.

Inasmuch as the congress was shortly to convene and Pacific cable legislation had been the subject of consideration by the congress for several years it seemed to me wise to defer action upon the application until the congress had first an opportunity to act. The congress adjourned without taking any action, leaving the matter in exactly the same condition in which it stood when the congress convened.

Meanwhile it appears that the Commercial Pacific Cable company had promptly proceeded with preparations for laying its cable. It also made application to the president for access to and use of soundings taken by the United States steamship *Nero* for the purpose of discovering a practicable route for a trans-Pacific cable, the company urging that with access to these soundings it could complete its cable much sooner than if it were required to take soundings upon its own account. Pending consideration of this subject it appeared important and desirable to attach certain conditions to the permission to examine and use the soundings if it should be granted.

In consequence of this solicitation of the cable company certain conditions were form-

ulated upon which the president was willing to allow access to these soundings and to consent to the landing and laying of the cable, subject to any alterations or additions thereto imposed by the congress. This was deemed proper, especially as it was clear that a cable connection of some kind with China, a foreign country, was a part of the company's plan. This course was, moreover, in accordance with a line of precedents, including President Grant's action in the case of the first French cable, explained to the congress in his annual message of December, 1875, and the instance occurring in 1879 of the second French cable, from Brest to St. Pierre, with a branch to Cape Cod.

These conditions prescribed, among other things, a maximum rate for commercial messages and that the company should construct a line from the Philippine islands to China, there being at present, as is well known, a British line from Manila to Hongkong.

The representatives of the cable company kept these conditions long under consideration, continuing in the meantime to prepare for laying the cable. They have, however, at length acceded to them and an all-American line between our Pacific coast and the Chinese empire, by way of Honolulu and the Philippine islands, is thus provided for and is expected within a few months to be ready for business.

Among the conditions is one reserving the power of the congress to modify or repeal any or all of them. A copy of the conditions is herewith transmitted.

Of Porto Rico it is only necessary to say that the prosperity of the island and the wisdom with which it has been governed have been such as to make it serve as an example of all that is best in insular administration.

On July 4 last, on the 126th anniversary of the declaration of our independence, peace and amnesty were promulgated in the Philippine islands. Some trouble has since from time to time threatened with the Mohammedan Moros, but with the late insurrectionary Filipinos the war has entirely ceased. Civil government has now been introduced. Not only does each Filipino enjoy such rights to life, liberty and the pursuit of happiness as he has never before known during the recorded history of the islands, but the people, taken as a whole, now enjoy a measure of self-government greater than that granted to any other orientals by any foreign power and greater than that enjoyed by any other orientals under their own government save the Japanese alone. We have not gone too far in granting these rights of liberty and self-government, but we have certainly gone to the limit that in the interests of the Philippine people themselves it was wise or just to go. To hurry matters, to go faster than we are now going, would entail calamity on the people of the islands. No policy ever entered into by the American people has vindicated itself in more signal manner than the policy of holding the Philippines. The triumph of our arms, above all the triumph of our laws and principles, has come sooner than we had any right to expect. Too much praise cannot be given to the army for what it has done in the Philippines, both in warfare and from an administrative standpoint, in preparing the way for civil government; and similar credit belongs to the civil authorities for the way in which they

have planted the seeds of self-government in the ground thus made ready for them. The courage, the undiminished endurance, the high soldierly efficiency and the general kind-heartedness and humanity of our troops have been strikingly manifested. There now remain only some 15,000 troops in the islands. All told, over 100,000 have been sent there. Of course there have been individual instances of wrongdoing among them. They warred under fearful difficulties of climate and surroundings, and under the strain of the terrible provocations which they continually received from their foes occasional instances of cruel retaliation occurred. Every effort has been made to prevent such cruelties and finally these efforts have been completely successful. Every effort has also been made to detect and punish the wrongdoers. After making all allowance for these misdeeds it remains true that few indeed have been the instances in which war has been waged by a civilized power against semicivilized or barbarous forces where there has been so little wrongdoing by the victors as in the Philippine islands. On the other hand, the amount of difficult, important and beneficent work which has been done is well-nigh incalculable.

Taking the work of the army and the civil authorities together it may be questioned whether anywhere else in modern times the world has seen a better example of real constructive statesmanship than our people have given in the Philippine islands. High praise should also be given those Filipinos, in the aggregate very numerous, who have accepted the new conditions and joined with our representatives to work with hearty good will for the welfare of the islands.

THE ARMY.

The army has been reduced to the minimum allowed by law. It is very small for the size of the nation and most certainly should be kept at the highest point of efficiency. The senior officers are given scant chance under ordinary conditions to exercise commands commensurate with their rank under circumstances which would fit them to do their duty in time of actual war. A system of maneuvering our army in bodies of some little size has been begun and should be steadily continued. Without such maneuvers it is folly to expect that in the event of hostilities with any serious foe even a small army corps could be handled to advantage. Both our officers and enlisted men are such that we can take hearty pride in them. No better material can be found. But they must be thoroughly trained, both as individuals and in the mass. The marksmanship of the men must receive special attention. In the circumstances of modern warfare the man must act far more on his own individual responsibility than ever before and the high individual efficiency of the unit is of the utmost importance. Formerly this unit was the regiment. It is now not the regiment, not even the troop or company; it is the individual soldier. Every effort must be made to develop every workmanlike and soldierly quality in both the officer and the enlisted man.

I urgently call your attention to the need of passing a bill providing for a general staff and for the reorganization of the supply departments on the lines of the bill proposed by the secretary of war last year. When the young officers enter the army from West Point they probably stand

above their compeers in any other military service. Every effort should be made—by training, by reward of merit, by scrutiny into their careers and capacity—to keep them of the same high relative excellence throughout their careers.

The measure providing for the reorganization of the militia system and for securing the highest efficiency in the national guard, which has already passed the house, should receive prompt attention and action. It is of great importance that the relation of the national guard to the militia and volunteer forces of the United States should be defined and that in place of our present obsolete laws a practical and efficient system should be adopted.

Provision should be made to enable the secretary of war to keep cavalry and artillery horses, worn out in long performance of duty. Such horses fetch but a trifle when sold, and rather than turn them out to the misery awaiting them when thus disposed of it would be better to employ them at light work around the posts and when necessary to put them painlessly to death.

THE NAVY.

For the first time in our history naval maneuvers on a large scale are being held under the immediate command of the admiral of the navy. Constantly increasing attention is being paid to the gunnery of the navy, but it is yet far from what it should be. I earnestly urge that the increase asked for by the secretary of the navy in the appropriation for improving the marksmanship be granted. In battle the only shots that count are the shots that hit. It is necessary to provide ample funds for practice with the great guns in time of peace. These funds must provide not only for the purchase of projectiles but for allowances for prizes to encourage the gun crews, and especially the gun pointers, and for perfecting an intelligent system under which alone it is possible to get good practice.

There should be no halt in the work of building up the navy, providing every year additional fighting craft. We are a very rich country, vast in extent of territory and great in population; a country, moreover, which has an army diminutive indeed when compared with that of any other first-class power. We have deliberately made our own certain foreign policies which demand the possession of a first-class navy. The isthmian canal will greatly increase the efficiency of our navy if the navy is of sufficient size, but if we have an inadequate navy then the building of the canal would be merely giving a hostage to any power of superior strength. The Monroe doctrine should be treated as the cardinal feature of American foreign policy, but it would be worse than idle to assert it unless we intended to back it up, and it can be backed up only by a thoroughly good navy. A good navy is not a provocative of war; it is the surest guaranty of peace.

Each individual unit of our navy should be the most efficient of its kind, as regards both material and personnel, that is to be found in the world. I call your special attention to the need of providing for the manning of the ships. Serious trouble threatens us if we cannot do better than we are now doing as regards securing the services of a sufficient number of the highest type of sailormen, of sea mechanics. The veteran seamen of our warships are

of as high a type as can be found in any navy which rides the waters of the world. They are unsurpassed in daring, in resolution, in readiness, in thorough knowledge of their profession. They deserve every consideration that can be shown them. But there are not enough of them. It is no more possible to improvise a crew than it is possible to improvise a warship. To build the finest ship, with the deadliest battery, and to send it aloft with a raw crew, no matter how brave they were individually, would be to insure disaster if a foe of average capacity were encountered. Neither ships nor men can be improvised when war has begun.

We need a thousand additional officers in order properly to man the ships now provided for and under construction. The classes at the naval school at Annapolis should be greatly enlarged. At the same time that we must add the officers where we need them we should facilitate the retirement of those at the head of the list whose usefulness has become impaired. Promotion must be fostered if the service is to be kept efficient.

The lamentable scarcity of officers and the large number of recruits and of unskilled men necessarily put aboard the new vessels as they have been commissioned has thrown upon our officers, and especially on the lieutenants and junior grades, unusual labor and fatigue and has gravely strained their powers of endurance. Nor is there sign of any immediate let-up in this strain. It must continue for some time longer, until more officers are graduated from Annapolis and until the recruits become trained and skillful in their duties. In these difficulties incident upon the development of our war fleet the conduct of all our officers has been creditable to the service and the lieutenant and junior grades in particular have displayed an ability and a steadfast cheerfulness which entitle them to the ungrudging thanks of all who realize the disheartening trials and fatigues to which they are of necessity subjected.

There is not a cloud on the horizon at present. There seems not the slightest chance of trouble with a foreign power. We most earnestly hope that this state of things may continue; and the way to insure its continuance is to provide for a thoroughly efficient navy. The refusal to maintain such a navy would invite trouble, and if trouble came would insure disaster. Fatuous self-complacency or vanity, or short-sightedness in refusing to prepare for danger, is both foolish and wicked in such a nation as ours; and past experience has shown that such fatuity in refusing to recognize or prepare for any crisis in advance is usually succeeded by a mad panic of hysterical fear once the crisis has actually arrived.

POSTAL AFFAIRS.

The striking increase in the revenues of the postoffice department shows clearly the prosperity of our people and the increasing activity of the business of the country.

The receipts of the postoffice department for the fiscal year ended June 30 last amounted to \$121,848,047.26, an increase of \$10,216,853.87 over the preceding year, the largest increase known in the history of the postal service. The magnitude of this increase will best appear from the fact that the entire postal receipts for the year 1860 amounted to but \$8,518,067.

Rural free-delivery service is no longer in the experimental stage; it has become a fixed policy. The results following its introduction have fully justified the congress in the large appropriations made for its establishment and extension. The average yearly increase in postoffice receipts in the rural districts of the country is about 2 per cent. We are now able, by actual results, to show that where rural free-delivery service has been established to such an extent as to enable us to make comparisons the yearly increase has been upward of 10 per cent.

On Nov. 1, 1902, 11,650 rural free-delivery routes had been established and were in operation, covering about one-third of the territory of the United States available for rural free-delivery service. There are now awaiting the action of the department petitions and applications for the establishment of 10,748 additional routes. This shows conclusively the want which the establishment of the service has met and the need of further extending it as rapidly as possible. It is justified both by the financial results and by the practical benefits to our rural population; it brings the men who live on the soil into close relations with the active business world; it keeps the farmer in daily touch with the markets; it is a potential educational force; it enhances the value of farm property, makes farm life far pleasanter and less isolated and will do much to check the undesirable current from country to city.

It is to be hoped that the congress will make liberal appropriations for the continuance of the service already established and for its further extension.

IRRIGATION.

Few subjects of more importance have been taken up by the congress in recent years than the inauguration of the system of nationally aided irrigation for the arid regions of the far west. A good beginning therein has been made. Now that this policy of national irrigation has been adopted the need of thorough and scientific forest protection will grow more rapidly than ever throughout the public-land states.

Legislation should be provided for the protection of the game and the wild creatures generally on the forest reserves. The senseless slaughter of game, which can be by judicious protection be permanently preserved on our national reserves for the people as a whole, should be stopped at once. It is, for instance, a serious count against our national good sense to permit the present practice of butchering off such a stately and beautiful creature as the elk for its antlers or tusks.

So far as they are available for agriculture, and to whatever extent they may be reclaimed under the national irrigation law, the remaining public lands should be held rigidly for the home-builder, the settler who lives on his land, and for no one else. In their actual use the desert-land law, the timber and stone law and the commutation clause of the homestead law have been so perverted from the intention with which they were enacted as to permit the acquisition of large areas of the public domain for other than actual settlers and the consequent prevention of settlement. Moreover, the approaching exhaustion of the public ranges has of late led to much discussion as to the best manner of using these public lands in the west which are

suitable chiefly or only for grazing. The sound and steady development of the west depends upon the building up of homes therein. Much of our prosperity as a nation has been due to the operation of the homestead law. On the other hand, we should recognize the fact that in the grazing region the man who corresponds to the homesteader may be unable to settle permanently if allowed to use only the same amount of pasture land that his brother, the homesteader, is allowed to use of arable land. One hundred and sixty acres of fairly rich and well-watered soil, or a much smaller amount of irrigated land, may keep a family in plenty, whereas no one could get a living from 160 acres of dry pasture land capable of supporting at the outside only one head of cattle to every ten acres. In the past great tracts of the public domain have been fenced in by persons having no title thereto, in direct defiance of the law forbidding the maintenance or construction of any such unlawful inclosure of public land. For various reasons there has been little interference with such inclosures in the past, but ample notice has now been given the trespassers and all the resources at the command of the government will hereafter be used to put a stop to such trespassing.

In view of the capital importance of these matters I commend them to the earnest consideration of the congress, and if the congress finds difficulty in dealing with them from lack of thorough knowledge of the subject I recommend that provision be made for a commission of experts specially to investigate and report upon the complicated questions involved.

LEGISLATION FOR ALASKA.

I especially urge upon the congress the need of wise legislation for Alaska. It is not to our credit as a nation that Alaska, which has been ours for thirty-five years, should still have as poor a system of laws as is the case. No country has a more valuable possession—in mineral wealth, in fisheries, furs, forests and also in land available for certain kinds of farming and stock growing. It is a territory of great size and varied resources, well fitted to support a large permanent population. Alaska needs a good land law and such provisions for homesteads and pre-emptions as will encourage permanent settlement. We should shape legislation with a view not to the exploiting and abandoning of the territory but to the building up of homes therein. The land laws should be liberal in type, so as to hold out inducements to the actual settler, whom we most desire to see take possession of the country. The forests of Alaska should be protected, and, as a secondary but still important matter, the game also, and at the same time it is imperative that the settlers should be allowed to cut timber, under proper regulations, for their own use. Laws should be enacted to protect the Alaskan salmon fisheries against the greed which would destroy them. They should be preserved as a permanent industry and food supply. Their management and control should be turned over to the commission of fish and fisheries. Alaska should have a delegate in the congress. It would be well if a congressional committee could visit Alaska and investigate its needs on the ground.

THE INDIANS.

In dealing with the Indians our aim should be their ultimate absorption into the

body of our people. But in many cases this absorption must and should be very slow. In portions of the Indian Territory the mixture of blood has gone on at the same time with progress in wealth and education, so that there are plenty of men with varying degrees of purity of Indian blood who are absolutely indistinguishable in point of social, political and economic ability from their white associates. There are other tribes which have as yet made no perceptible advance toward such equality. To try to force such tribes too fast is to prevent their going forward at all. Moreover, the tribes live under widely different conditions. Where a tribe has made considerable advance and lives on fertile farming soil it is possible to allot the members lands in severally much as is the case with white settlers. There are other tribes where such a course is not desirable. On the arid prairie lands the effort should be to induce the Indians to lead pastoral rather than agricultural lives and to permit them to settle in villages rather than to force them into isolation.

The large Indian schools situated remote from any Indian reservation do a special and peculiar work of great importance. But, excellent though these are, an immense amount of additional work must be done on the reservations themselves among the old and above all among the young Indians.

The first and most important step toward the absorption of the Indian is to teach him to earn his living; yet it is not necessarily to be assumed that in each community all Indians must become either tillers of the soil or stock raisers. Their industries may properly be diversified and those who show special desire or adaptability for industrial or even commercial pursuits should be encouraged so far as practicable to follow each his own bent.

Every effort should be made to develop the Indian along the lines of natural aptitude and to encourage the existing native industries peculiar to certain tribes, such as the various kinds of basket weaving, canoe building, smith work and blanket work. Above all, the Indian boys and girls should be given confident command of colloquial English and should ordinarily be prepared for a vigorous struggle with the conditions under which their people live, rather than for immediate absorption into some more highly developed community.

The officials who represent the government in dealing with the Indians work under hard conditions and also under conditions which render it easy to do wrong and very difficult to detect wrong. Consequently they should be amply paid on the one hand and on the other hand a particularly high standard of conduct should be demanded from them, and where misconduct can be proved the punishment should be exemplary.

AGRICULTURE.

In no department of government work in recent years has there been greater success than in that of giving scientific aid to the farming population, thereby showing them how most efficiently to help themselves. There is no need of insisting upon its importance, for the welfare of the farmer is fundamentally necessary to the welfare of the republic as a whole. In addition to such work as quarantine against animal and vegetable plagues and warring against them when here introduced, much efficient help has been rendered to the farmer by

the introduction of new plants specially fitted for cultivation under the peculiar conditions existing in different portions of the country. New cereals have been established in the semiarid west. For instance, the practicability of producing the best types of macaroni wheats in regions of an annual rainfall of only ten inches or thereabouts has been conclusively demonstrated. Through the introduction of new rices in Louisiana and Texas the production of rice in this country has been made to about equal the home demand. In the southwest the possibility of regrassing overstocked range lands has been demonstrated; in the north many new forage crops have been introduced, while in the east it has been shown that some of our choicest fruits can be stored and shipped in such a way as to find a profitable market abroad.

I again recommend to the favorable consideration of the congress the plans of the Smithsonian institution for making the museum under its charge worthy of the nation and for preserving at the national capital records not only of the vanishing races of men but of the animals of this continent, which, like the buffalo, will soon become extinct unless specimens from which their representatives may be renewed are sought in their native regions and maintained there in safety.

THE DISTRICT OF COLUMBIA.

The District of Columbia is the only part of our territory in which the national government exercises local or municipal functions and where in consequence the government has a free hand in reference to certain types of social and economic legislation which must be essentially local or municipal in their character. The government should see to it, for instance, that the hygienic and sanitary legislation affecting Washington is of a high character. The evils of slum dwellings, whether in the shape of crowded and congested tenement-house districts or of the back-alley type, should never be permitted to grow up in Washington. The city should be a model in every respect for all the cities of the country. The charitable and correctional systems of the district should receive consideration at the hands of the congress to the end that they may embody the results of the most advanced thought in these fields. Moreover, while Washington is not a great industrial city, there is some industrialism here, and our labor legislation, while it would not be important in itself, might be made a model for the rest of the nation. We should pass, for instance, a wise employer's liability act for the District of Columbia, and we need such an act in our navy yards. Railroad companies in the district ought to be required by law to block their frogs.

The safety-appliance law for the better protection of the lives and limbs of railway employees, which was passed in 1893, went into full effect on Aug. 1, 1901. It has resulted in averting thousands of casualties. Experience shows, however, the necessity of additional legislation to perfect this law. A bill to provide for this passed the senate at the last session. It is to be hoped that some such measure may now be enacted into law.

There is a growing tendency to provide for the publication of masses of documents for which there is no public demand and for the printing of which there is no real necessity. Large numbers of volumes are turned out by the government printing presses for which there is no justification. Nothing should be printed by any of the departments unless it contains something of permanent value, and the congress could with advantage cut down very materially on all the printing which it has now become customary to provide. The excessive cost of government printing is a strong argument against the position of those who are inclined on abstract grounds to advocate the government's doing any work which can with propriety be left in private hands.

Gratifying progress has been made during the year in the extension of the merit system of making appointments in the government service. It should be extended by law to the District of Columbia. It is much to be desired that our consular system be established by law on a basis providing for appointment and promotion only in consequence of proved fitness.

Through a wise provision of the congress at its last session the white house, which had become disfigured by incongruous additions and changes, has now been restored to what it was planned to be by Washington. In making the restorations the utmost care has been exercised to come as near as possible to the early plans and to supplement these plans by a careful study of such buildings as that of the University of Virginia, which was built by Jefferson. The white house is the property of the nation, and so far as is compatible with living therein it should be kept as it originally was, for the same reasons that we keep Mount Vernon as it originally was. The stately simplicity of its architecture is an expression of the character of the period in which it was built and is in accord with the purpose it was designed to serve. It is a good thing to preserve such buildings as historic monuments which keep alive our sense of continuity with the nation's past. The reports of the several executive departments are submitted to the congress with this communication.

THEODORE ROOSEVELT.

White House, Dec. 2, 1902.

INVENTION OF THE AUTOMOBILE.

No one man can be said to have invented the automobile. The machine as it is today is the product of many minds in many countries. Horseless vehicles date back almost to the time when steam became a motive power, and as long ago as 1802 Richard Trevithick, an Englishman, constructed a machine which made a trip of ninety miles over country roads. In 1833 Delamare-Deboutteville and Malfandin of Paris invented a tricycle propelled by compressed gas and a year later used petro-

leum for generating power. Messrs. Panhard and Levassor were the first to invent a really practical petroleum motor. This was in 1890, since which time the development of the various types of road motors has been rapid, particularly in France. Electricity as a motive power for road machines was first used in the early 80s, but it was not until about 1898 that it began to be looked upon as a rival of petroleum.

CLIMATOLOGY OF THE UNITED STATES.

The following table of average rainfall, highest and lowest temperatures, based upon observations of thirty-two or fewer years at selected stations in the several states and territories of the United States, was compiled from the records of the weather bureau for The Chicago Daily News Almanac by the United States weather bureau, Washington, D. FISHERIES OF THE GREAT LAKES.

The number of persons engaged in the commercial fisheries of the great lakes in 1899 was 9,670. By far the greater proportion of these (6,657) were engaged in the shore or boat fisheries. There were employed on vessels fishing, 1,156; on vessels transporting, 92; the remainder, 1,765, being shoremen. The lakes whose fisheries employed the greatest numbers were Erie and Michigan, there being 3,728 engaged in the former and 3,255 in the latter. The numbers employed in the fisheries of other lakes were as follows: Huron, 1,241; Superior, 613; St. Clair, 442; Ontario, 391.

The amount of capital invested in the fisheries of these lakes was \$6,617,716. The investment in Lake Michigan was \$2,915,241; in Lake Erie, \$2,720,554; in Lake Huron, \$474,953; in Lake Superior, \$372,083; in Lake

Ontario, \$80,350, and in Lake St. Clair, \$54,535. As compared with 1893 the capital invested has increased \$718,446. There has been an increase in the investment in Lake Michigan of \$851,744, in Lake Erie \$213,712 and in Lake Ontario \$24,219. The investment in the fisheries of the other lakes has decreased as follows: Lake Superior, \$156,941; Huron, \$28,747; St. Clair, \$185,541.

Some of the more important species yielded by the fisheries were: Herring, 59,913,576 pounds, valued at \$941,067; lake trout, 10,611,588 pounds, valued at \$431,276; yellow perch, 9,584,802 pounds, valued at \$156,350; whitefish, 5,094,014 pounds, valued at \$297,023; blue pike, 4,731,782 pounds, valued at \$148,740; wall-eyed pike, 3,311,892 pounds, valued at \$156,503; sturgeon, 1,129,348 pounds, valued at \$81,085.

BANANA TRADE OF THE UNITED STATES.

In the fiscal year ended June 30, 1901, the value of the bananas imported into the United States amounted to \$6,550,186. The fruit is grown to some extent in southern Florida, but since the severe frost of 1894 the supply from this source has dwindled almost to nothing. The republic of Colombia sent \$998,830 worth of bananas to this country in 1900, but more than 80 per cent of the imports came from the states of Central America and the West Indies. The following table compiled by the statistician of the agricultural department shows the proportion furnished by each of the chief

banana-producing countries in the years named:

*Includes scattering, blank and defective votes.

In Kansas the democratic and people's parties had each an electoral ticket, but the names were identical on both. In some counties the clerks gave all the democratic and populist votes to the populist ticket, and in others they were separated as cast. For this reason it is impossible to tell exactly how many votes the democrats cast and how many the populists cast. Of the Bryan vote of 162,601 the returns indicate that 60,185 were cast by the democrats and 102,416 by the populists. There was no Barker, or middle-of-the-road populist, ticket in the field. The same condition existed four years previously in some states in which the two parties voted for the same electors, but upon separate tickets, as county officers then, as now, combined the votes on electors and credited them all to one or the other party.

Vote of States and Territories by Counties.

NOTE.—It was announced after the election in November, 1902, that an attempt would be made to throw out, on the ground of fraud, all the democratic representatives elected on the face of the returns in Arapahoe county and those districts of which Arapahoe forms a part. If this should be done the republicans would have a majority or 16 in a joint ballot of the legislature.

*No election held.

At the election in 1902 three amendments to the state constitution were voted on but all failed of getting a majority. One was for a biennial session of the legisla-

ture, one for a new method of amending the constitution and the third for regulating the manner in which counties may become stockholders in corporations, etc.

*This is the combined democratic and populist vote. The Bryan and Sewall electors received 10,179 votes and the Bryan and Watson electors 458.

In 1902 for governor the vote was:

Gen. John McCullough, Rep.....	31,778
Felix W. McGettrich, Dem.....	7,280
Perceival W. Clement, high license.....	28,117
Joel O. Sherburne, Pro.....	2,458

Since a majority over all is necessary to select, the election was thrown into the general assembly, which chose Gen. McCullough.

FOR REPRESENTATIVES IN CONGRESS, 1902.

1. Counties of Addison, Bennington, Chittenden, Franklin, Grand Isle, Lamoille and Rutland.

D. J. Foster, Rep.

2. Counties of Caledonia, Essex, Orange,

NEW YORK CITY ELECTION.

(Nov. 5, 1901.)

In the fall municipal campaign in New York city the two leading candidates for mayor were Seth Low, president of Columbia university and ex-mayor of Brooklyn, and E. M. Shepard, a lawyer in good standing. The former was supported by the republicans, the Citizens' union and the Greater New York Democracy as well as by minor organizations; his opponent was the candidate of the Tammany society, led by Richard Croker. Judge William Travers Jerome, fusion candidate for district attorney of Manhattan, was a prominent figure in the campaign, which was conducted with much earnestness and vigor on both sides. The result was a victory for the fusion nominees. The vote for Low and Shepard by boroughs was:

! SPEED OF RAILROAD TRAINS.

Records for speed were broken on many of the American railroads in 1902. Among the exceptionally fast runs reported were these:

March 24, a train on the Burlington road ran from Eckley to Wray, Col., a distance of 14.8 miles, in 9 minutes, or at the rate of 98.6 miles an hour.

April 15, on the Wabash railroad, the 150 miles between Tilton and Granite City, Ill., were covered in 180 minutes, including stops. The actual running time was 158 minutes.

June 21 a mail train on the Harrisburg division of the Pennsylvania road ran 132 miles in 129 minutes. This was said at the

time to have been the fastest long-distance run on the Pennsylvania system.

June 30 on the Mohawk division of the New York Central railroad, the "Twentieth Century Limited" made the 148 miles between Albany and Syracuse in 145 minutes, including a stop at Utica and several slow-downs.

Nov. 25 a limited train on the Lake Shore road ran from Elkhart, Ind., to Chicago, a distance of 101 miles, in 100 minutes, this time including several slow-downs.

The fastest regular trains in the United States run between Philadelphia and Atlantic City. The schedule calls for a speed of from 63 to 67 miles an hour.

County of Cook.

POPULATION OF CHICAGO.

POPULATION OF CHICAGO BY WARDS.

[United States census of 1900.]

NOTE—The figures in this and other tables, unless otherwise specified, are for the wards as they were constituted in 1900, when the federal census was taken. The boundaries have since been changed.

12.....	75,507	24.....	35,850	Total	1,698,575

Of Chicago's population in 1900, 863,408 were males and 835,167 females; 30,150 were negroes, 1,209 Chinese, 68 Japanese and 8 Indians; 511,038 were males 21 years of age and over.

CITY DIRECTORY ESTIMATE.

The Chicago city directory for 1902 contains 625,500 names. Based on the federal census of 1900, this would, according to the estimates of the publishers, give the city a population of 1,820,000. They assert, however, that the last census was much too small, while that of 1890 was correct. Taking the latter as a basis, they compute the present population of Chicago at 2,144,000. The health department used 1,820,000 as the basis of the city's vital statistics.

The enumerators found 204 males and 229 females between 12 and 21 years of age who could not read and 195 males and 205 females who could not write. The greatest number of these were found in the 9th, 10th and 19th wards. Poverty, ill health and negligence of parents were the chief causes ascribed.

TAXATION IN CHICAGO.

List of the eleven boards making annual levies within the city limits:

1. **STATE TAX**—For state purposes. The governor, auditor and treasurer constitute the board which ascertains the rate per cent required to produce the amount of taxes levied by the general assembly. "The state school tax" is levied in the same manner. The rate for all state purposes varies from 50 to 60 cents on the \$100 assessed valuation.
2. **COUNTY TAX**—The county board levies the taxes for all county purposes, the aggregate of which is limited to 75 cents on the \$100.
3. **CITY TAX**—The city council, acting with the mayor, levies the taxes for all city purposes.
4. **SCHOOL TAX**—The city council and the mayor make a separate levy for this purpose.
5. **LIBRARY TAX**—The city council and the mayor make a separate levy for this purpose. The levy is 10 cents on the \$100.
6. **SANITARY DISTRICT**—The tax is levied by the board of trustees. The rate now is 50 cents on the \$100.
7. **SOUTH PARK SYSTEM**—The south park commissioners levy for park purposes in

the towns of South Chicago, Hyde Park and Lake.

8. **WEST PARK SYSTEM**—The West Chicago park commissioners levy for park purposes in the town of West Chicago. The rate for 1902 was \$1.15 on the \$100.
9. **LINCOLN PARK**—The Lincoln park commissioners are not "corporate authorities," the Lincoln park act not having been adopted by popular vote. The levy for Lincoln park is made by the county treasurer, acting as ex-officio supervisor.
10. **RIDGE PARK**—A small park district in Rogers Park, organized under the law providing for local park districts by popular vote. The board of five commissioners levies for the district, its last levy being \$1 on the \$100.
11. **THE NORTH SHORE PARK DISTRICT**—Organized the same as Ridge Park. The last levy was 42 cents on the \$100.

By an act of the legislature approved May 11, 1901, and by the vote of the people at the spring election in 1902 the townships lying within the limits of Chicago were consolidated and the powers of the town boards transferred to the city council. This reduced the taxing boards in Chicago from eighteen to eleven as above.

THE PRINTING

WILL SUIT YOUR CUSTOMERS IF YOU EQUIP
YOUR OFFICE WITH

SUPERIOR COPPER-MIXED TYPE

Better still, you will make a good profit on the work. Our customers say SUPERIOR COPPER-MIXED TYPE is so much more durable than any other that they can cut their allowance for depreciation of plant in half and still keep the office in better physical condition than it would be with twice the amount spent for new material were any other type used.

With twice the durability and much greater lightness you are saving in two ways—you get more for your money and buy less frequently....

ISN'T THAT A GOOD WAY TO INCREASE PROFITS?

Call for our Best System Uniform Line Type.... We have over twelve hundred different fonts of it.....

THE VENEZUELAN AFFAIR.

Early in December, 1902, Great Britain and Germany, acting in concert, made a demand upon President Castro of Venezuela for the settlement of certain debts, amounting all told to less than \$1,000,000, and for compensation for damages sustained by British navigators and British and German residents in Venezuela. To enforce this demand the two powers sent a number of cruisers and gunboats in command of Commodores Montgomerie and Scheder to La Guayra, the principal seaport of the republic. Dec. 8 the joint demands of Germany and Great Britain were formally presented to President Castro, after which the ministers of the two nations withdrew from Caracas, leaving the interests of their respective countries in the hands of Mr. Bowen, minister of the United States to Venezuela.

President Castro refused to comply with the demands and the British and German war vessels began what was at first called

a peaceful blockade of the Venezuelan coast. Dec. 9 four small vessels belonging to the Venezuelan navy were seized at La Guayra, towed outside the harbor and sunk. Dec. 13 the forts at Puerto Cabello were bombarded and silenced by the allies because of the failure of the authorities to give satisfaction for an attack upon the British steamer Topaze.

Dec. 16 Italy notified the state department at Washington that she had joined with Great Britain and Germany in demanding the settlement of claims for damages by Italian residents in Venezuela.

Dec. 17 it was announced in the house of commons by Premier Balfour that a state of war existed and that the blockade of Venezuelan ports would be enforced against all neutral nations alike. He disclaimed any intention on the part of Great Britain to occupy Venezuelan territory. The same announcement was made in Berlin on behalf of Germany.

CHICAGO WATERWORKS SYSTEM.

The following table shows the growth of Chicago's waterworks system by decades since 1854, when the first large pumping

station at Chicago avenue and the lake was built. [From compilations made by Assistant City Engineer J. H. Spengler.]

YR.	Pop. (school census)	Gallons pumped per day.	Gals. per cap.	Water pipe mil'ge.	Total revenue.	YR.	Pop. (school census)	Gallons pumped per day.	Gals. per cap.	Water pipe mil'ge.	Total revenue.

COMBINED INDEX

OF FIRST EIGHTEEN VOLUMES (1885 TO 1902 INCLUSIVE) OF THE CHICAGO DAILY NEWS ALMANAC.

NOTE—The figures following the year are the page numbers of that volume.

Back numbers of THE DAILY NEWS ALMANAC are available for every year since 1890 with the exception of the issue of 1897.

The first five issues—for the years 1885, 1886, 1887, 1888 and 1889—are bound in one volume, half morocco, library style. This volume is sold only to purchasers of complete sets of the almanac. A complete set embraces the library volume and a cloth-bound issue for each succeeding year. In figuring the price for a complete set, add \$1.50 for the library volume to the sum total for the issues of succeeding years at 50 cents each. Orders should be addressed to THE DAILY NEWS, 123 5th avenue, Chicago.

 as much as to be informed."*

—Printer's Ink.

For that reason we beg to REMIND you

1. That The Chicago Daily News has an average sale of over 300,000 copies daily.
2. That for more than 25 years it has published the exact number of papers sold every day and such statements are subscribed to by the publisher under oath.
3. That this is the largest similarly attested newspaper circulation in the United States.
4. That the advertising rates per line per thousand circulation are among the lowest, if not the lowest, of all the daily papers in the country.
5. That The Chicago Daily News sells more advertising space than any six-day paper in the country.

R. HOE & CO.'S

NEW COMBINATION SUPPLEMENT PRESS

This machine is designed to meet the demands of newspapers requiring a simple, efficient and moderate-priced Stereotype Perfecting Press for 4, 6, 8, 10 and 12 page papers. It gives a running speed per hour of

20,000 4 or 6 page papers.

10,000 8, 10 or 12 page papers,

with all the leaves inset, pasted if desired, and the papers delivered folded and counted. The 8, 10 and 12 page papers are produced from a single set of plates.

Similar machines are also made to print 16-page papers, as well as the other products mentioned above.
